

Chapter 1: Getting Started with Drinking Water Quality Testing (DWQT)

Program Description:

A free 4-week online certificate program on Getting Started with Drinking Water Quality Testing (DWQT) is an introductory-level program that can be completed on your own time and will incorporate a series of e-learning modules, webinars, and opportunities for engagement with participants and instructors. The medium of the program is the English language.

This is broken into two components:

1. The online learning platform
2. The program meeting or interaction series

Expectations for a certificate of completion

1. Complete all modules
2. Pass all quizzes
3. Participate in virtual discussion
4. Attend the program webinar
