

# **GSSO Negative Experience Draft Concepts**

---

Canada Health Infoway Sex-Gender Working Group (SGWG)

November 26<sup>th</sup>, 2024

Charlene Lam Business Analyst, CTSS, Ministry of Health

Kelly Davison RN, CTSS, University of Victoria

# Territorial Acknowledgement

---

The Ministry of Health would like to acknowledge that we are calling from the unceded territories of the Musqueam, Squamish, Tsleil-Waututh and Tsawwassen First Nations. We respectfully acknowledge the diversity of all the Indigenous nations, communities, cultures, languages across the province and country.

# Background

---

- The Ministry of Health, Health Information Standards (HIS) team is working on updating the [GSSO Standard & Guide](#) to version 3.2
- The focus for this release is developing SNOMED CT concepts that represent the patient's negative experiences such as (e.g. outing, misgendering, misnaming)
- Environmental scan shows no existing concepts exists for sexual orientation, gender identity or Indigenous gender identity negative experience concepts

# Negative Experience in Literature

---

*“The health of 2SLGBTQIA+ individuals has often been compromised by stigmatization, discrimination, a lack of visibility, and a lack of cultural competency in the health care system (10–21). In addition, the notion of intersectionality explains how 2SLGBTQIA+ individuals may be confronted with multiple interlinked forms of discrimination like cis-hetero-normativity, agism, ableism and racism, that when combined, increase vulnerability to health inequities and lead to inferior clinical outcomes (22–25). In other words, the health equity gap widens increasingly.”*
