

[Irfan Hakim] 12:58:26  
Thanks.

[Irfan Hakim] 12:58:28  
Let's train up.

[Dean Matthews (Infoway)] 13:00:48  
Hello, everyone! I know. It's

[Dean Matthews (Infoway)] 13:00:51  
11, one or.

[Dean Matthews (Infoway)] 13:00:54  
Whatever time zone you're in. There's only a few of us on. So we're just gonna give a few more minutes. Let some more people join. Then we'll get going.

[Dean Matthews (Infoway)] 13:02:23  
Welcome everyone. We're just gonna give a.

[Dean Matthews (Infoway)] 13:02:26  
Couple more minutes, another minute or 2 to let some more people join, and we can get going.

[Dean Matthews (Infoway)] 13:03:38  
Looks like we might have a smaller crowd today.

[Dean Matthews (Infoway)] 13:03:41  
Must be vacation, time.

[Dean Matthews (Infoway)] 13:03:55  
So we'll we'll get started. We haven't seen the number increase a little bit, so.

[Dean Matthews (Infoway)] 13:04:05  
Irfan, I'll hand it over to you. You're gonna do the first.st

[Irfan Hakim] 13:04:10  
Absolutely.

[Irfan Hakim] 13:04:13  
Actually.

[Irfan Hakim] 13:04:15  
Okay, perfect.

[Irfan Hakim] 13:04:16  
So I'll just confirm that my audience.

[Irfan Hakim] 13:04:20  
It's been. It's been a David tech today.

[Irfan Hakim] 13:04:25  
So for for folks on the call

[Irfan Hakim] 13:04:28  
The agenda for today is us going over the queries and capability statements again.

[Irfan Hakim] 13:04:36  
Just.

[Irfan Hakim] 13:04:37  
Getting.

[Irfan Hakim] 13:04:38  
Any and all inputs from from the working group. Here.

[Irfan Hakim] 13:04:41  
And

[Irfan Hakim] 13:04:44  
Up.

[Irfan Hakim] 13:04:45  
What you'd like to see.

[Irfan Hakim] 13:04:48  
From from that site as well as

[Irfan Hakim] 13:04:51  
A any guidance around.

[Irfan Hakim] 13:04:53  
That within the guide as well. And then today, we're actually also gonna go into the Cacd guide.

[Irfan Hakim] 13:05:00  
And walk you through.

[Irfan Hakim] 13:05:02  
What a guide looks like right now. And we will also be asking.

[Irfan Hakim] 13:05:06  
Everyone on the call for.

[Irfan Hakim] 13:05:10  
Just their thoughts what they would like to see additionally.

[Irfan Hakim] 13:05:14  
Either in kittens or.

[Irfan Hakim] 13:05:21

Better reading those kinds of things to be included within the guide as well. And that's that's the agenda for for today.

[Irfan Hakim] 13:05:32  
As we had.

[Irfan Hakim] 13:05:34  
Previously done and mentioned in the last

[Irfan Hakim] 13:05:37  
Couple of sessions

[Irfan Hakim] 13:05:41  
We. We had gone ahead and created that.

[Irfan Hakim] 13:05:46  
Oh!

[Irfan Hakim] 13:05:47  
A view in terms of

[Irfan Hakim] 13:05:50  
What was supposed to be kind of required.

[Irfan Hakim] 13:05:53  
From.

[Irfan Hakim] 13:05:54  
From this.

[Irfan Hakim] 13:05:54  
From this specification, including.

[Irfan Hakim] 13:06:01  
The search parameters.

[Irfan Hakim] 13:06:03  
Majority for for the majority part, Mcsd focuses on just the get and post functionalities and some of the required functionalities. Some of the required parameters. It.

[Irfan Hakim] 13:06:16  
It wants to have included within the

[Irfan Hakim] 13:06:20  
Within the systems is the the.

[Irfan Hakim] 13:06:23  
The idea identifier last updated parameters as well.

[Irfan Hakim] 13:06:29

And.

[Irfan Hakim] 13:06:31

From that piece. I mean we we are.

[Irfan Hakim] 13:06:35

Just.

[Irfan Hakim] 13:06:37

Reviewing what we had talked about last week, which was.

[Irfan Hakim] 13:06:41

Around the healthcare service. What are some of the parameters.

[Irfan Hakim] 13:06:46

That are kind of available out there.

[Irfan Hakim] 13:06:51

And similarity with location, distance.

[Irfan Hakim] 13:06:56

Organization.

[Irfan Hakim] 13:07:00

Practitioner, practitioner, role.

[Irfan Hakim] 13:07:03

Organization endpoint.

[Irfan Hakim] 13:07:06

Beyond this

[Irfan Hakim] 13:07:10

Did folks

[Irfan Hakim] 13:07:13

On the call. Get a chance to review any of

[Irfan Hakim] 13:07:19

Any of this

[Irfan Hakim] 13:07:22

From last week? And were there any questions on any of these.

[Irfan Hakim] 13:07:27

Search parameters that we've put any additional guidance that.

[Irfan Hakim] 13:07:31

Anyone on the call wanted.

[Irfan Hakim] 13:07:32  
To be put around this.

[Irfan Hakim] 13:07:40  
Tip, yes.

[Tim Berezny, Caredove (CTO)] 13:07:40  
I guess my question is, why would you search by endpoint.

[Tim Berezny, Caredove (CTO)] 13:07:44  
What is like? What is the use case? There.

[Irfan Hakim] 13:07:49  
So

[Irfan Hakim] 13:07:50  
On on that piece.

[Irfan Hakim] 13:07:53  
There's

[Irfan Hakim] 13:07:55  
Within Mcsd, I can actually.

[Irfan Hakim] 13:07:58  
I I do have the guide open. I think it's a.

[Irfan Hakim] 13:08:27  
And Mcsd,

[Irfan Hakim] 13:08:30  
In, in.

[Irfan Hakim] 13:08:32  
The different roles that you can. You can use it for.

[Tim Berezny, Caredove (CTO)] 13:08:37  
Sorry just just to be clear. I'm not asking. I'm not asking what the usage of endpoint is. I I understand that I'm asking what is the usage of doing a search by endpoint?

[Irfan Hakim] 13:08:41  
Huh!

[Irfan Hakim] 13:08:49  
Oh!

[Dean Matthews (Infoway)] 13:08:52  
The.

[Dean Matthews (Infoway)] 13:08:53  
The only example I could see is, if you're using the

[Dean Matthews (Infoway)] 13:08:58  
Status of it. So you wanna see if it's gonna be an expiring

[Dean Matthews (Infoway)] 13:09:03  
Some of those discussions we had earlier on about.

[Dean Matthews (Infoway)] 13:09:06  
The must supports on the.

[Dean Matthews (Infoway)] 13:09:08  
Status and active date. I think they were that we turned into obligations. It's  
it's basically being able to make sure that the endpoints is always available.

[Tim Berezny, Caredove (CTO)] 13:09:17  
Right.

[Dean Matthews (Infoway)] 13:09:17  
Just doing a refresh on it once in a while.

[Tim Berezny, Caredove (CTO)] 13:09:19  
Hmm.

[Dean Matthews (Infoway)] 13:09:20  
And it is a shift we're putting in, as I should not, a shell.

[Tim Berezny, Caredove (CTO)] 13:09:24  
Right.

[Irfan Hakim] 13:09:25  
Yeah, it is optional functionality. For now.

[Tim Berezny, Caredove (CTO)] 13:09:28  
Okay.

[Irfan Hakim] 13:09:37  
Tim based based on that question, would would you like us to perhaps state within  
the guide itself.

[Irfan Hakim] 13:09:44  
Oh!

[Irfan Hakim] 13:09:48  
In in a more concrete manner. Which of these would be.

[Irfan Hakim] 13:09:52  
Optionals, in which one of which ones would are we stating as completely required.

[Irfan Hakim] 13:10:00

And where in the guide, would you like to see that as well? I think there's

[Irfan Hakim] 13:10:05

If it's if it's okay with folks, I'm just gonna.

[Irfan Hakim] 13:10:09

Perhaps jump to the guidance.

[Irfan Hakim] 13:10:11

Vok folks.

[Irfan Hakim] 13:10:13

Through where everything is right now.

[Tim Berezny, Caredove (CTO)] 13:10:15

Maybe maybe I'll just state, like, from my standpoint, what the.

[Tim Berezny, Caredove (CTO)] 13:10:19

Used cases for endpoint, and there's there's, I'm sure there's more. But I'll just stay mine.

[Tim Berezny, Caredove (CTO)] 13:10:24

Is.

[Tim Berezny, Caredove (CTO)] 13:10:25

Say, referral goes through.

[Tim Berezny, Caredove (CTO)] 13:10:27

So healthcare service isn't included in the package.

[Tim Berezny, Caredove (CTO)] 13:10:29

So I could go to a get.

[Tim Berezny, Caredove (CTO)] 13:10:32

I include star that includes the endpoint.

[Tim Berezny, Caredove (CTO)] 13:10:35

In the payload, which then tells me what endpoint I need to send this.

[Tim Berezny, Caredove (CTO)] 13:10:38

Referral to.

[Tim Berezny, Caredove (CTO)] 13:10:40

Or sorry I'm doing directory search. I get the information about the service directory. The endpoint is in the payload.

[Tim Berezny, Caredove (CTO)] 13:10:45

If you know if my bundle includes.

[Tim Berezny, Caredove (CTO)] 13:10:48  
The necessary resources, and I send to that.

[Tim Berezny, Caredove (CTO)] 13:10:50  
I send it that endpoint. So it's really for retrieving where I'm going to.

[Tim Berezny, Caredove (CTO)] 13:10:54  
Sent to for the purpose of submitting a referral.

[Tim Berezny, Caredove (CTO)] 13:10:59  
So, you know, in that flow, in its pure sense, like, I don't have to ever get endpoint.

[Tim Berezny, Caredove (CTO)] 13:11:05  
On its own, or do a search by endpoint, or even more like I saw, like scoply. I would never do a search for what organizations or services are at an endpoint.

[Tim Berezny, Caredove (CTO)] 13:11:14  
That's not a.

[Tim Berezny, Caredove (CTO)] 13:11:16  
It's not a use case I can think of. It's fine to include in the guide is something where, if somebody wants to implement that. Here's how you here's how you would do it.

[Tim Berezny, Caredove (CTO)] 13:11:23  
So, you know. So being should instead of shell is is fine from that perspective. That is, that is my main use case for endpoint.

[Irfan Hakim] 13:11:35  
Look at it!

[Dean Matthews (Infoway)] 13:11:35  
And that that endpoint, or that that usage definitely makes sense.

[Thomas Zhou (AH)] 13:11:41  
I thought me.

[Thomas Zhou (AH)] 13:11:43  
May not have.

[Thomas Zhou (AH)] 13:11:45  
Pretty much here. But just question this.

[Thomas Zhou (AH)] 13:11:48  
Maybe some questions. Quite a long time ago. The business go of this.

[Thomas Zhou (AH)] 13:11:53  
Project.

[Thomas Zhou (AH)] 13:11:54  
If it's be utilized at different layers and.

[Thomas Zhou (AH)] 13:11:58  
To one religious, facilitate any interested.

[Thomas Zhou (AH)] 13:12:02  
Users to view their own directory in their manner.

[Thomas Zhou (AH)] 13:12:06  
Sounds like there is some.

[Thomas Zhou (AH)] 13:12:09  
Oh, just registration function.

[Thomas Zhou (AH)] 13:12:12  
Be included in this project.

[Thomas Zhou (AH)] 13:12:15  
Because endpoints, as team mentioned.

[Thomas Zhou (AH)] 13:12:17  
Directly, go to the access point.

[Thomas Zhou (AH)] 13:12:22  
In, the.

[Thomas Zhou (AH)] 13:12:23  
Broader picture.

[Thomas Zhou (AH)] 13:12:25  
You allow the.

[Thomas Zhou (AH)] 13:12:28  
Service, cluster.

[Thomas Zhou (AH)] 13:12:31  
To search for certain services.

[Thomas Zhou (AH)] 13:12:34  
Which could.

[Thomas Zhou (AH)] 13:12:35  
Come back the response with multiple endpoints which at one.

[Thomas Zhou (AH)] 13:12:40  
Could be.

[Thomas Zhou (AH)] 13:12:41

Be suitable.

[Thomas Zhou (AH)] 13:12:43  
For the communication of the next connection between these 2.

[Thomas Zhou (AH)] 13:12:47  
Service requester and.

[Thomas Zhou (AH)] 13:12:49  
To, to.

[Thomas Zhou (AH)] 13:12:50  
Responsor in that manner.

[Dean Matthews (Infoway)] 13:13:04  
So.

[Dean Matthews (Infoway)] 13:13:07  
For.

[Dean Matthews (Infoway)] 13:13:10  
So the the initial review of the initial scope is definitely going to be E-rec.

[Dean Matthews (Infoway)] 13:13:16  
Which kind of limits some of the the features that we're putting in probably will not be because we're biasing it off. Mcsd.

[Dean Matthews (Infoway)] 13:13:23  
It does allow for, be on what is needed for erect, which.

[Dean Matthews (Infoway)] 13:13:28  
Some jurisdictions as we start getting into more patient access, and things like that, or other services that.

[Dean Matthews (Infoway)] 13:13:35  
The Directory may expand and start, including some of those.

[Dean Matthews (Infoway)] 13:13:38  
Some of these things that are there that are in Mcsd. I don't see being used in the 1st release.

[Dean Matthews (Infoway)] 13:13:44  
Like. Maybe no one is. No jurisdiction will actually implement the query, endpoints

[Dean Matthews (Infoway)] 13:13:49  
To get information on it if they're not going to use the.

[Dean Matthews (Infoway)] 13:13:53  
Starter or inactive dates.

[Dean Matthews (Infoway)] 13:13:57

But we're just putting it in there to allow for a more broader solution. If.

[Dean Matthews (Infoway)] 13:14:04

Chosen in the future.

[Dean Matthews (Infoway)] 13:14:06

If that helps.

[Thomas Zhou (AH)] 13:14:13

On my limit and standing. Can we say it's more like a.

[Thomas Zhou (AH)] 13:14:17

Placeholder.

[Dean Matthews (Infoway)] 13:14:24

They so like. Just the endpoint itself is a placeholder or.

[Dean Matthews (Infoway)] 13:14:28

Or what are we.

[Thomas Zhou (AH)] 13:14:29

The surgeon.

[Thomas Zhou (AH)] 13:14:30

Search function here. As you mentioned.

[Thomas Zhou (AH)] 13:14:33

My understanding. So the.

[Thomas Zhou (AH)] 13:14:35

Search function, including.

[Thomas Zhou (AH)] 13:14:39

To search in a point.

[Thomas Zhou (AH)] 13:14:41

This specific.

[Thomas Zhou (AH)] 13:14:44

Function.

[Thomas Zhou (AH)] 13:14:46

Entreat it as a placeholder for the future purpose.

[Dean Matthews (Infoway)] 13:14:49

Yeah.

[Dean Matthews (Infoway)] 13:14:49

And.

[Dean Matthews (Infoway)] 13:14:51

One thing that's a little different about the Service Directory versus like erect is.

[Dean Matthews (Infoway)] 13:14:56

We're basically as it as the Forum states that we're using. It's a building block. It.

[Dean Matthews (Infoway)] 13:15:01

It's.

[Dean Matthews (Infoway)] 13:15:02

A.

[Dean Matthews (Infoway)] 13:15:04

It's not a product. Guide, like an erefal guide, is.

[Dean Matthews (Infoway)] 13:15:09

Where you're. It's more of a technical guide. So.

[Dean Matthews (Infoway)] 13:15:13

Endpoint. Is there?

[Dean Matthews (Infoway)] 13:15:15

It is available to be added and included in searches.

[Dean Matthews (Infoway)] 13:15:19

So from the technical point of view, it's available when.

[Dean Matthews (Infoway)] 13:15:23

People, whichever jurisdictions or vendors, or whoever chooses to start creating a directory.

[Dean Matthews (Infoway)] 13:15:30

Then this is available for them to decide what and maybe.

[Dean Matthews (Infoway)] 13:15:33

It gives them that extra layer. That's so. When.

[Dean Matthews (Infoway)] 13:15:39

Someone starts creating that directory. This is what they can use to build on, and they may choose not to implement the endpoint at that point, either. It is really going to be up to.

[Dean Matthews (Infoway)] 13:15:47

The people who create the product.

[Dean Matthews (Infoway)] 13:15:48

That are built on this technology for this, built on this technical guide.

[Dean Matthews (Infoway)] 13:15:54  
To be able to use when they're designing their next product.

[Dean Matthews (Infoway)] 13:15:58  
So it.

[Dean Matthews (Infoway)] 13:15:59  
On at this level. It's.

[Dean Matthews (Infoway)] 13:16:01  
A bit more open and.

[Dean Matthews (Infoway)] 13:16:03  
Includes things that.

[Dean Matthews (Infoway)] 13:16:04  
Some of them, and maybe none of the actual products will include. But it is just there as.

[Dean Matthews (Infoway)] 13:16:13  
Information that's available and.

[Dean Matthews (Infoway)] 13:16:15  
Processes that are available if they choose to use them.

[Dean Matthews (Infoway)] 13:16:18  
So that's why we left a lot like in the queries. There's very fews.

[Dean Matthews (Infoway)] 13:16:22  
Or very few shell. Sorry there's there's a lot of should's.

[Tim Berezny, Caredove (CTO)] 13:16:25  
Yeah.

[Dean Matthews (Infoway)] 13:16:26  
Because th those resources support them.

[Dean Matthews (Infoway)] 13:16:28  
And so.

[Dean Matthews (Infoway)] 13:16:29  
They're there for that point of view only.

[Tim Berezny, Caredove (CTO)] 13:16:33  
Yeah, it's a good philosophy.

[Tim Berezny, Caredove (CTO)] 13:16:37  
It sort of brings it begs. Another question to me is like, as far as the you know, we just talked about. Well, what's the use case for how you might use this

directory in your referral.

[Tim Berezny, Caredove (CTO)] 13:16:47

You know is is the is the commentary that we wanna do for those used cases. Something we wanna include.

[Tim Berezny, Caredove (CTO)] 13:16:54

Here in this you were in this

[Tim Berezny, Caredove (CTO)] 13:16:56

Service Directory Guide, or is that someone you've got that like? Do it over in the Referral Guide and Reference, the Healthcare Service Guide.

[Tim Berezny, Caredove (CTO)] 13:17:04

Or both.

[Thomas Zhou (AH)] 13:17:07

Yeah.

[Thomas Zhou (AH)] 13:17:09

Just follow up with teams.

[Thomas Zhou (AH)] 13:17:11

I assume, is a question here.

[Thomas Zhou (AH)] 13:17:15

Certain architecture and talk I'm able to think about.

[Thomas Zhou (AH)] 13:17:19

What exactly.

[Thomas Zhou (AH)] 13:17:22

To find a bounded contacts.

[Thomas Zhou (AH)] 13:17:24

Here.

[Thomas Zhou (AH)] 13:17:26

If we retreat, it's a.

[Thomas Zhou (AH)] 13:17:27

The.

[Thomas Zhou (AH)] 13:17:29

My understanding.

[Thomas Zhou (AH)] 13:17:30

The original. This project, Health.

[Thomas Zhou (AH)] 13:17:35

Purchase as a.

[Thomas Zhou (AH)] 13:17:37  
Fake.

[Thomas Zhou (AH)] 13:17:38  
Domain.

[Thomas Zhou (AH)] 13:17:39  
Driven.

[Thomas Zhou (AH)] 13:17:40  
Model.

[Thomas Zhou (AH)] 13:17:42  
A design model.

[Thomas Zhou (AH)] 13:17:44  
Now we need to figure out.

[Thomas Zhou (AH)] 13:17:48  
Is that it? The first.st

[Thomas Zhou (AH)] 13:17:49  
Launch or 1st start.

[Thomas Zhou (AH)] 13:17:51  
You know this project just.

[Thomas Zhou (AH)] 13:17:54  
Focus on your referral, which is, we quoted another.

[Thomas Zhou (AH)] 13:18:00  
Bond to the contacts.

[Thomas Zhou (AH)] 13:18:04  
How to see it. That's it.

[Thomas Zhou (AH)] 13:18:06  
Garrria to focus, to to view this service. Request. Sorry this Service Directory.

[Thomas Zhou (AH)] 13:18:11  
Project.

[Dean Matthews (Infoway)] 13:18:13  
But even focusing on your referral.

[Dean Matthews (Infoway)] 13:18:16  
Is.

[Dean Matthews (Infoway)] 13:18:17

A broad scope, because each jurisdiction could choose, and has chosen.

[Dean Matthews (Infoway)] 13:18:22

Different structures of how they are setting up their direct like, how they're setting up their re referral process like central service versus going to each systems, like all of those.

[Dean Matthews (Infoway)] 13:18:35

Structures that are used for erefal.

[Dean Matthews (Infoway)] 13:18:37

Could result in different directory structures.

[Dean Matthews (Infoway)] 13:18:40

So it's.

[Dean Matthews (Infoway)] 13:18:42

Even saying it's Erell. We still have to keep it at a higher scope, because.

[Dean Matthews (Infoway)] 13:18:48

A lot of this is based around.

[Dean Matthews (Infoway)] 13:18:51

How is each jurisdiction going to structure the Directory.

[Dean Matthews (Infoway)] 13:18:54

Even if it's a central intake.

[Dean Matthews (Infoway)] 13:18:58

Is the Directory going to support, searching.

[Dean Matthews (Infoway)] 13:19:02

In multiple zones, so that when they send to the central intake they're saying, This is the zone I want to include. Or this is where I want it to be sent to.

[Dean Matthews (Infoway)] 13:19:10

So there's there's just a lot that can be done on top of this like this is really just.

[Dean Matthews (Infoway)] 13:19:15

This is the foundation that.

[Dean Matthews (Infoway)] 13:19:17

The Directory really built on. So we're we're just saying, this is what the foundation has to contain.

[Tim Berezny, Caredove (CTO)] 13:19:26

Yeah, so can I. Just if I just reinterpret that back with different words, I think you're saying that like that.

[Tim Berezny, Caredove (CTO)] 13:19:31  
You know that specific use case logic.

[Tim Berezny, Caredove (CTO)] 13:19:35  
Like error on the side of documenting that in.

[Tim Berezny, Caredove (CTO)] 13:19:39  
The guide is related to those use cases as opposed to in this guide.

[Dean Matthews (Infoway)] 13:19:44  
Yeah, yeah.

[Tim Berezny, Caredove (CTO)] 13:19:45  
Yeah.

[Dean Matthews (Infoway)] 13:19:45  
And and some of, and we have been keeping a few notes on the side of things.

[Dean Matthews (Infoway)] 13:19:51  
Once we got this guy done, then the jurisdictions, or whoever's creating the directories, will use this as their base, and then they can.

[Dean Matthews (Infoway)] 13:19:58  
Add specifics because they'll know how they want the Directory to set up. And they're gonna say.

[Dean Matthews (Infoway)] 13:20:02  
You have to support this location, you have to support the health services, because that's.

[Dean Matthews (Infoway)] 13:20:08  
Or to our Directory.

[Dean Matthews (Infoway)] 13:20:09  
Where? Here we're just saying.

[Dean Matthews (Infoway)] 13:20:10  
This is available.

[Dean Matthews (Infoway)] 13:20:13  
So it's kind of it's.

[Dean Matthews (Infoway)] 13:20:14  
We've got to kind of make everything available at this level so that the next ones aren't.

[Dean Matthews (Infoway)] 13:20:20  
Pigeon hold into an area that they don't want to go.

[Tim Berezny, Caredove (CTO)] 13:20:23  
Yeah. So I guess I think what I want to do then is.

[Tim Berezny, Caredove (CTO)] 13:20:27  
Bring back and make sure that they use cases, as it relates to the healthcare service.

[Tim Berezny, Caredove (CTO)] 13:20:32  
Are included in the Referral Guide.

[Tim Berezny, Caredove (CTO)] 13:20:34  
And that the 2 guides like point back to each other correspondingly. There's a section, your business context. And we say, Bund, you just have a sort of a paragraph that says, Oh, there's a bunch of you referral cases. And here's a link to the Canadian referral.

[Tim Berezny, Caredove (CTO)] 13:20:48  
Spec. And then we've got like pages and pages of commentary that might have all the details around how you might use it.

[Tim Berezny, Caredove (CTO)] 13:20:56  
You know, referencing this guide. Is that an approach that would make sense.

[Dean Matthews (Infoway)] 13:20:59  
Yeah, I like that approach. I think.

[Dean Matthews (Infoway)] 13:21:02  
Think that's good. It helps tie the 2 together.

[Dean Matthews (Infoway)] 13:21:04  
For sure.

[Tim Berezny, Caredove (CTO)] 13:21:05  
Okay.

[Tim Berezny, Caredove (CTO)] 13:21:07  
Take that note back to the referral group.

[Dean Matthews (Infoway)] 13:21:12  
And Mark's on here as well, I noticed. So that's good. So.

[Dean Matthews (Infoway)] 13:21:15  
I'll I'll reach out to Mark, and we can figure out which ones that we want to.

[Dean Matthews (Infoway)] 13:21:20  
Have.

[Dean Matthews (Infoway)] 13:21:22  
Links to from the.

[Dean Matthews (Infoway)] 13:21:23  
From the Service Directory.

[Mark Fernandes] 13:21:31  
Yes, that's noted, Dean.

[Dean Matthews (Infoway)] 13:21:33  
Thanks, mark.

[Dean Matthews (Infoway)] 13:21:36  
And so we can. We'll probably include on this guide we'll probably include examples of. Here's some examples that of how this directory could be used and and point to that E refer guide as examples of how they can be used. So.

[Dylan McAllister (Epic)] 13:21:53  
So with that intent in mind, I did just want to ask, What is the then goal of like this specific Ig versus, just like.

[Dylan McAllister (Epic)] 13:22:01  
General Mcsd.

[Dylan McAllister (Epic)] 13:22:03  
Or these are definitely things that are more.

[Dylan McAllister (Epic)] 13:22:04  
Jurisdictional, and maybe more relevant to a certain versus others, but, like what you described, sounds very similar to.

[Dylan McAllister (Epic)] 13:22:11  
Like Mcsd's Ig. And also their white paper that they published.

[Dylan McAllister (Epic)] 13:22:15  
Around the care potential use cases. And here are specific resources. You could use.

[Dylan McAllister (Epic)] 13:22:20  
In those specific use cases.

[Dean Matthews (Infoway)] 13:22:22  
Yeah, and that that's really what it'll be very similar to the Mcsd guide. We want to try to make sure that we have whatever Canadian spin on it that we need cause it is this is like theirs is an international. Ours is a.

[Dean Matthews (Infoway)] 13:22:35  
Canadian jurisdictional. So we might have.

[Dean Matthews (Infoway)] 13:22:39  
Different areas around security or anything like that, specific.

[Dean Matthews (Infoway)] 13:22:45

But it really is.

[Dean Matthews (Infoway)] 13:22:48  
Kind of building on what Mcsd is, and.

[Dean Matthews (Infoway)] 13:22:52  
And giving the relationships back to the Canadian.

[Dean Matthews (Infoway)] 13:22:56  
Canadian view like for Iraq and if we once we get into patient access.

[Dean Matthews (Infoway)] 13:23:02  
We could link this back to the patient access. If they're gonna have directories that patients can use in their apps. Things like that.

[Dean Matthews (Infoway)] 13:23:26  
If, Eric, do you want to go on? If you're going to the dead, you can go into the next section.

[Irfan Hakim] 13:23:33  
Oh, yes,

[Irfan Hakim] 13:23:36  
So I've.

[Irfan Hakim] 13:23:38  
I provide the link for

[Irfan Hakim] 13:23:40  
The Guide.

[Irfan Hakim] 13:23:42  
Within this within this.

[Irfan Hakim] 13:23:46  
Deck that we will be posting on on the page. But.

[Irfan Hakim] 13:23:50  
I'll move back to the guide over here. Can folks see the guide, or am I still sharing my.

[Dean Matthews (Infoway)] 13:23:55  
Yeah.

[Irfan Hakim] 13:23:57  
Probably that.

[Dean Matthews (Infoway)] 13:23:57  
We could see the guide.

[Irfan Hakim] 13:23:59  
Offline.

[Irfan Hakim] 13:24:00  
Okay, so

[Irfan Hakim] 13:24:03  
Would you be interested in.

[Irfan Hakim] 13:24:05  
Walking through the guy.

[Irfan Hakim] 13:24:07  
Odd.

[Dean Matthews (Infoway)] 13:24:07  
Sure.

[Dean Matthews (Infoway)] 13:24:09  
Here. I'll just share my screen. Then.

[Dean Matthews (Infoway)] 13:24:22  
So.

[Dean Matthews (Infoway)] 13:24:23  
The the structure that guide.

[Dean Matthews (Infoway)] 13:24:25  
Don't worry about the look yet. We're gonna be updating the look. We're we're actually working on trying to come up with a.

[Dean Matthews (Infoway)] 13:24:32  
National Guide. Look so that we'll have a consistent look to it.

[Dean Matthews (Infoway)] 13:24:38  
We are looking at. This is actually a simplify. Our guide created by flyerly.

[Dean Matthews (Infoway)] 13:24:42  
And we're looking at, maybe using this look.

[Dean Matthews (Infoway)] 13:24:46  
To use for a Canadian guide, so it'll be HL. 7 versus HL. 7 international.

[Dean Matthews (Infoway)] 13:24:53  
But this would be kind of the look, and then any.

[Dean Matthews (Infoway)] 13:24:57  
Other Canadian projects could use this template so that they have a similar look and feel so.

[Dean Matthews (Infoway)] 13:25:02

Do you have thoughts on that? Please let us know what in the chats or forums, or whatever. But that's kind of the direction we're going.

[Dean Matthews (Infoway)] 13:25:08

From a look point of view. A National Guide.

[Dean Matthews (Infoway)] 13:25:11

And from here. This is just the content we're focusing on.

[Dean Matthews (Infoway)] 13:25:16

So.

[Dean Matthews (Infoway)] 13:25:18

The descriptions, the resource relationships, defined terms.

[Dean Matthews (Infoway)] 13:25:23

And we will add some in there we are referencing the infoscribe page similar to how Erek and some of the other projects.

[Dean Matthews (Infoway)] 13:25:31

Have that.

[Dean Matthews (Infoway)] 13:25:34

Service that have that infrescribe page.

[Dean Matthews (Infoway)] 13:25:35

So we'll we are referencing that from here, similar to other guides.

[Dean Matthews (Infoway)] 13:25:42

Business context or usage highlights.

[Dean Matthews (Infoway)] 13:25:45

So what are the base profiles? What are the extensions and value sets.

[Dean Matthews (Infoway)] 13:25:51

We'll be calling out, use cases for Erec. So this could be there where we.

[Dean Matthews (Infoway)] 13:25:58

Pointing, pointing to like the

[Dean Matthews (Infoway)] 13:26:02

E-rec guide.

[Dean Matthews (Infoway)] 13:26:04

So technical context, we look at.

[Dean Matthews (Infoway)] 13:26:08

Background, conformance, capabilities.

[Dean Matthews (Infoway)] 13:26:12  
Expected actions.

[Dean Matthews (Infoway)] 13:26:14  
Must support definitions.

[Dean Matthews (Infoway)] 13:26:17  
And obligations, calling out that that we are using it. Those types of things from a context.

[Dean Matthews (Infoway)] 13:26:22  
And then the used cases.

[Dean Matthews (Infoway)] 13:26:25  
Based off today's call. We might want to update this a little bit. But.

[Dean Matthews (Infoway)] 13:26:29  
These are the ones that we did.

[Dean Matthews (Infoway)] 13:26:31  
Originally create.

[Dean Matthews (Infoway)] 13:26:35  
From when we 1st started. So these are the use cases that we 1st created when we 1st started this project. So those what we put in here for now.

[Dean Matthews (Infoway)] 13:26:46  
And then going on to technical. We have the background.

[Dean Matthews (Infoway)] 13:26:50  
Conformance, language, capabilities, expected actions.

[Dean Matthews (Infoway)] 13:26:53  
Constraints, my support, definitions.

[Dean Matthews (Infoway)] 13:26:56  
Oops!

[Dean Matthews (Infoway)] 13:27:00  
Did you come? Oh, yeah. Notes.

[Dean Matthews (Infoway)] 13:27:04  
So our our roles. We only have the 2 actors right now.

[Dean Matthews (Infoway)] 13:27:09  
Model diagrams.

[Dean Matthews (Infoway)] 13:27:11  
Put this in. I'm not sure if you guys want to keep it or not, but it's really just trying to show.

[Dean Matthews (Infoway)] 13:27:16

How directories could be set up. It's kind of giving some examples of the structures. And it's the same diagrams that we used in the July 4th deck, when we walk through the the flows.

[Dean Matthews (Infoway)] 13:27:26

So just.

[Dean Matthews (Infoway)] 13:27:28

Giving that a little bit of an example of.

[Dean Matthews (Infoway)] 13:27:30

How things could be set up, cause it is very when you 1st look at the spec, it's kinda.

[Dean Matthews (Infoway)] 13:27:37

Daunting to to know how to use it. So just trying to give some examples for that.

[Dean Matthews (Infoway)] 13:27:41

And then guidance.

[Dean Matthews (Infoway)] 13:27:45

So we're basing it up. Mcsd, we're gonna talk a bit about identifiers. We've had a couple of questions on it like ids.

[Dean Matthews (Infoway)] 13:27:52

Practitioner ids, license numbers. Whatever types of different identifiers. Just kind of give that extra information.

[Dean Matthews (Infoway)] 13:28:02

Most people are familiar with, and I difference between an id and identifier. But we'll just make sure that that is there.

[Dean Matthews (Infoway)] 13:28:08

Security.

[Dean Matthews (Infoway)] 13:28:09

Just giving some feedback and pointing to because it is based off of Mcsd. We are pointing to their document on what they do. Pre considerations.

[Dean Matthews (Infoway)] 13:28:20

If you, when you do start really reviewing this, if this doesn't fit for the Canadian context, please let us know, and we'll we'll make any of the changes, and that that goes for the whole guide, like we're.

[Dean Matthews (Infoway)] 13:28:29

You guys are the end users. We wanna make sure this is what you're looking for. So.

[Dean Matthews (Infoway)] 13:28:32

Please give us all the feedback you can on that.

[Dean Matthews (Infoway)] 13:28:40

They had endpoint usage considerations in the Mcs Guide. I've looked through it a bit. I'm still.

[Dean Matthews (Infoway)] 13:28:47

Deciding whether that's neat or not. So take a look that when you do go through this guide and see what you think, if that is something we need to put in.

[Dean Matthews (Infoway)] 13:28:56

Or if that's just strictly just another element on the other resources.

[Dean Matthews (Infoway)] 13:29:02

Then going into all the fire artifacts.

[Dean Matthews (Infoway)] 13:29:06

So we.

[Dean Matthews (Infoway)] 13:29:08

Scope and usage.

[Dean Matthews (Infoway)] 13:29:09

Resource. Contents.

[Dean Matthews (Infoway)] 13:29:11

Terminology, bindings.

[Dean Matthews (Infoway)] 13:29:13

Some of this is not here yet. We haven't actually.

[Dean Matthews (Infoway)] 13:29:16

Generated the profiles. We're still just using the so the profiles that are on here. Still don't contain the snapshots. They only

[Dean Matthews (Infoway)] 13:29:26

Continuing the snapshot. They don't contain the differentials yet.

[Dean Matthews (Infoway)] 13:29:28

So this stuff will get filled in once we publish the guide properly, but just showing

[Dean Matthews (Infoway)] 13:29:34

What's there?

[Dean Matthews (Infoway)] 13:29:36

Showing the comments.

[Dean Matthews (Infoway)] 13:29:38

So if you, if you don't show that it's only what is in this one common is brings

everything about that element. So you can see the full one, even from all of anything that's derived from.

[Dean Matthews (Infoway)] 13:29:48  
And then same exact same for all of these.

[Dean Matthews (Infoway)] 13:29:52  
So it's.

[Dean Matthews (Infoway)] 13:29:54  
Has a they. We created a.

[Dean Matthews (Infoway)] 13:29:56  
Template page. So every firefile has the same look to it.

[Dean Matthews (Infoway)] 13:30:04  
So similar onto those.

[Dean Matthews (Infoway)] 13:30:07  
Search parameters will be added to the bottom.

[Dean Matthews (Infoway)] 13:30:09  
For those that support parameters so we'll have a table.

[Dean Matthews (Infoway)] 13:30:13  
Similar to what some of the other guides have.

[Dean Matthews (Infoway)] 13:30:16  
Here's the ones that are available. Here's the ones that Shelby supported, based off of discussions we've had earlier on

[Dean Matthews (Infoway)] 13:30:26  
On our other calls. We want to do that.

[Dean Matthews (Infoway)] 13:30:29  
And so list all the the artifacts and then standard downloads. Be able to download a guide copy of the Guide. All the resources via zip examples.

[Dean Matthews (Infoway)] 13:30:41  
And there'll be.

[Dean Matthews (Infoway)] 13:30:43  
Tgz, Ed, so you need to fall back, be able to pull back a full package as well. I just haven't include that link here, but there will be a section to be able to pull back the full.

[Dean Matthews (Infoway)] 13:30:52  
Full package from it, as well.

[Dean Matthews (Infoway)] 13:30:53

And then the change log just.

[Dean Matthews (Infoway)] 13:30:56  
What the, what the changes, and if there's any known issues that haven't been addressed yet. So.

[Dean Matthews (Infoway)] 13:31:01  
That.

[Dean Matthews (Infoway)] 13:31:02  
The overall structure of the Guides.

[Dean Matthews (Infoway)] 13:31:06  
With quick overview of the contact.

[Dean Matthews (Infoway)] 13:31:09  
Any questions? Or do you want to go back and relook at any of those sections? Or if you.

[Dean Matthews (Infoway)] 13:31:13  
The

[Dean Matthews (Infoway)] 13:31:15  
Page is available. If anybody's wanting to look at it.

[Dean Matthews (Infoway)] 13:31:23  
And I'll just copy that into the chat.

[Tim Berezny, Caredove (CTO)] 13:31:25  
So you can.

[Tim Berezny, Caredove (CTO)] 13:31:25  
The technical contact. 1st contact for a second.

[Dean Matthews (Infoway)] 13:31:27  
Yeah, you bet.

[Dean Matthews (Infoway)] 13:31:29  
Which section would you like to see?

[Tim Berezny, Caredove (CTO)] 13:31:32  
Description.

[Tim Berezny, Caredove (CTO)] 13:31:33  
Okay, just go to background.

[Tim Berezny, Caredove (CTO)] 13:31:44  
So.

[Tim Berezny, Caredove (CTO)] 13:31:50

This is, this is great. A lot of this is really the. Here's my main concern is that.

[Tim Berezny, Caredove (CTO)] 13:31:58  
There is still there is.

[Tim Berezny, Caredove (CTO)] 13:32:00  
A lot of this is like just sort of the main bones structure architecture of how the resources connect to each other.

[Tim Berezny, Caredove (CTO)] 13:32:08  
For the most part, which is good and important.

[Tim Berezny, Caredove (CTO)] 13:32:11  
But there is still like.

[Tim Berezny, Caredove (CTO)] 13:32:14  
A lot of interpretation.

[Tim Berezny, Caredove (CTO)] 13:32:16  
On how to use these resources, that that remains.

[Tim Berezny, Caredove (CTO)] 13:32:23  
So.

[Tim Berezny, Caredove (CTO)] 13:32:25  
You know, an example would be like what might seem like a really simple question.

[Tim Berezny, Caredove (CTO)] 13:32:29  
Is. You know, where do I put the phone number.

[Tim Berezny, Caredove (CTO)] 13:32:33  
For a, for a service.

[Tim Berezny, Caredove (CTO)] 13:32:34  
Right.

[Dean Matthews (Infoway)] 13:32:36  
Yep.

[Tim Berezny, Caredove (CTO)] 13:32:37  
Alright, and when you look in the resources like well, I could put it in the organization. I can put in a healthcare service. I can put in a location I can put in the practitioner. I can put in the practitioner role. There's literally 5 places.

[Tim Berezny, Caredove (CTO)] 13:32:48  
5 answers to that question.

[Tim Berezny, Caredove (CTO)] 13:32:51

And.

[Tim Berezny, Caredove (CTO)] 13:32:51

You know, if we wanna move towards some consistency in how it's implemented? If we don't provide some guidance on questions like that, and there are a lot of questions like that like a lot.

[Dean Matthews (Infoway)] 13:33:01

Okay.

[Dean Matthews (Infoway)] 13:33:02

So.

[Dean Matthews (Infoway)] 13:33:04

On that example, the phone.

[Dean Matthews (Infoway)] 13:33:07

We can provide guidance and state that.

[Dean Matthews (Infoway)] 13:33:11

And depending on how you guys want to word it. But really.

[Dean Matthews (Infoway)] 13:33:15

It's going to depend on the structure like.

[Dean Matthews (Infoway)] 13:33:18

Do. We set up a hierarchy that says.

[Dean Matthews (Infoway)] 13:33:20

If your guide has.

[Dean Matthews (Infoway)] 13:33:23

Healthcare Service. The phone number is from the Healthcare Service.

[Dean Matthews (Infoway)] 13:33:29

Or is it always from location? Or is it always from organization like? Is there.

[Dean Matthews (Infoway)] 13:33:34

I don't know that this guy can say, this is where you have to start phone number, because if we say you have to start on our organization.

[Dean Matthews (Infoway)] 13:33:41

And someone doesn't use organization in their guide, in their in their directory.

[Dean Matthews (Infoway)] 13:33:47

Then it doesn't work.

[Dean Matthews (Infoway)] 13:33:49

So we can give guidance. That says.

[Dean Matthews (Infoway)] 13:33:52

If your structure has these resources, this is the order of priority to look.

[Dean Matthews (Infoway)] 13:33:58

And then you'd see if those resources even exist in yours in that structure or not.

[Tim Berezny, Caredove (CTO)] 13:34:03

Yeah, like, I believe order of priority is, is the correct answer to this question.

[Tim Berezny, Caredove (CTO)] 13:34:10

And you may even have.

[Tim Berezny, Caredove (CTO)] 13:34:12

Architectures where the phone number can exist in multiple places like your organization could have a phone number and your service.

[Tim Berezny, Caredove (CTO)] 13:34:18

Could have a phone number and your location could have a phone number.

[Dean Matthews (Infoway)] 13:34:22

And the Healthcare Service can.

[Tim Berezny, Caredove (CTO)] 13:34:22

Right. That's that's that's not a question. Saying which one do I go into? It's like, which one do I use if I'm just trying to present a flat service directory page to a user.

[Dean Matthews (Infoway)] 13:34:25

Yeah.

[Dean Matthews (Infoway)] 13:34:28

Yeah.

[Tim Berezny, Caredove (CTO)] 13:34:29

And and there's an answer to that question, and it's really comes down to like.

[Tim Berezny, Caredove (CTO)] 13:34:32

Okay. Well.

[Tim Berezny, Caredove (CTO)] 13:34:33

If this is available, use this, and you kind of go down the list, whichever one you hit first.st

[Tim Berezny, Caredove (CTO)] 13:34:37

You know, is, is the guidance that we should provide for that particular question.

[Dean Matthews (Infoway)] 13:34:41

Yeah. And we talked about that here yesterday on that as well. Like.

[Dean Matthews (Infoway)] 13:34:45

The healthcare service could point to multiple locations. And then so if you're saying.

[Tim Berezny, Caredove (CTO)] 13:34:49  
Yeah.

[Dean Matthews (Infoway)] 13:34:50  
You go from healthcare service to location.

[Dean Matthews (Infoway)] 13:34:52  
And there isn't 1 on healthcare service. Great. We go to next. So now you have 2 locations. Do you have to show both and make them both available. Or do you.

[Dean Matthews (Infoway)] 13:35:01  
How do you, prior like? What is the order priority on that one.

[Dean Matthews (Infoway)] 13:35:05  
And I don't. I'm not watching that for now it's it's something to consider when we create. That is.

[Dean Matthews (Infoway)] 13:35:11  
When you can have.

[Dean Matthews (Infoway)] 13:35:13  
Multiples at some of the levels. The order.

[Dean Matthews (Infoway)] 13:35:17  
Still gets to that? Okay, which are the 2? Do we choose, or to which of the 3 do we choose.

[Tim Berezny, Caredove (CTO)] 13:35:23  
Yeah.

[Irfan Hakim] 13:35:25  
Tim, going back to your comment a couple of.

[Irfan Hakim] 13:35:29  
Sessions ago around taxonomy and the use of taxonomy to define these hierarchies.

[Irfan Hakim] 13:35:35  
Those were definitely like considered, we are working on.

[Irfan Hakim] 13:35:39  
Again. This is not a finished version of the guide and we're working on kind of defining at a at a higher level

[Irfan Hakim] 13:35:48  
Where we can put those hierarchies in.

[Irfan Hakim] 13:35:51

And it it is a.

[Irfan Hakim] 13:35:52

It is a piece that we are currently working on, and.

[Irfan Hakim] 13:35:57

We will be showing this to the group next week, as well in in terms of the additional guidance that we're kind of putting in as well.

[Irfan Hakim] 13:36:07

And to that piece where.

[Irfan Hakim] 13:36:10

Specifically, would you like to see that.

[Irfan Hakim] 13:36:12

Be present in the guide.

[Irfan Hakim] 13:36:16

For, for that to be.

[Irfan Hakim] 13:36:18

You know.

[Irfan Hakim] 13:36:18

For folks to kind of go to and.

[Irfan Hakim] 13:36:22

Would that be business, or.

[Tim Berezny, Caredove (CTO)] 13:36:23

It's somewhere between guidance or technical content or business context. It's 1 of those 3.

[Tim Berezny, Caredove (CTO)] 13:36:29

Let's click on guidance for a second. Let me see what that one.

[Tim Berezny, Caredove (CTO)] 13:36:33

Mean just to that one is.

[Dean Matthews (Infoway)] 13:36:33

And and we could add other things on here for sure, like we can add order priority to this guidance as a section as well. So.

[Irfan Hakim] 13:36:36

Huh!

[Tim Berezny, Caredove (CTO)] 13:36:40

Yeah, so okay, so you're kind of on the.

[Tim Berezny, Caredove (CTO)] 13:36:42  
Sort of on that mindset here with ids and identifiers.

[Tim Berezny, Caredove (CTO)] 13:36:46  
Security, maybe endpoint usage considerations. And then there's like, I said, there's probably a dozen or 2 dozen things on those lists where.

[Tim Berezny, Caredove (CTO)] 13:36:55  
This, this might, this might be the spot. It's like specific guidance, and what the meanings of of these things are.

[Tim Berezny, Caredove (CTO)] 13:37:01  
And we need to come up with what those.

[Tim Berezny, Caredove (CTO)] 13:37:03  
Those questions are.

[Tim Berezny, Caredove (CTO)] 13:37:05  
You know, if you if you do, go and look back at the Google document notes from that symposium a few years ago.

[Tim Berezny, Caredove (CTO)] 13:37:11  
It does have most of the.

[Tim Berezny, Caredove (CTO)] 13:37:15  
Questions that you need to be asked.

[Tim Berezny, Caredove (CTO)] 13:37:17  
Like exclusively stated as.

[Tim Berezny, Caredove (CTO)] 13:37:20  
As questions,

[Tim Berezny, Caredove (CTO)] 13:37:21  
And so, you know, even if you don't get them all in there, some of them there just really.

[Tim Berezny, Caredove (CTO)] 13:37:26  
You know. Think about how you do want to. Architect, where? What is the placeholder for those things in the guide? And conversely, probably in some of the

[Tim Berezny, Caredove (CTO)] 13:37:35  
Notes, about.

[Tim Berezny, Caredove (CTO)] 13:37:37  
Specific elements.

[Tim Berezny, Caredove (CTO)] 13:37:39  
You're probably gonna want to link to.

[Tim Berezny, Caredove (CTO)] 13:37:42

But like a guidance section on the page, like in the phone number ones, for example, like maybe in the notes.

[Tim Berezny, Caredove (CTO)] 13:37:48

For each of those phone numbers, you say, for guidance on usage of those field refer to, and you link to.

[Tim Berezny, Caredove (CTO)] 13:37:53

Possibly a section.

[Tim Berezny, Caredove (CTO)] 13:37:54

On this page. If that's a you know, if we can come up with a pattern.

[Tim Berezny, Caredove (CTO)] 13:37:57

Something like that on how to do it, and you've got at least like.

[Tim Berezny, Caredove (CTO)] 13:38:01

You know a half dozen or more things as a template. Then we can continue to flesh out and build out like all the questions.

[Tim Berezny, Caredove (CTO)] 13:38:08

Eventually as this, as these nuances come up.

[Dean Matthews (Infoway)] 13:38:12

Okay.

[Dean Matthews (Infoway)] 13:38:13

So you're one like in the actual profile itself, like on the phone number elements.

[Dean Matthews (Infoway)] 13:38:18

You'd want to link from that back to the guide.

[Tim Berezny, Caredove (CTO)] 13:38:21

I I think that would be extremely useful to implementers. Yeah.

[Dean Matthews (Infoway)] 13:38:26

So.

[Dean Matthews (Infoway)] 13:38:28

The thing to be careful about is.

[Dean Matthews (Infoway)] 13:38:32

I guess we, if we only ever link to current, then it should work.

[Dean Matthews (Infoway)] 13:38:36

I was thinking like you, you've gone and you make another like. You don't touch the resources, but you go and create another. I guide version because you're we're adding things as we go.

[Dean Matthews (Infoway)] 13:38:44  
So I guess as long as you only ever link to the current one, that link to the profile should be okay.

[Tim Berezny, Caredove (CTO)] 13:38:45  
Yeah.

[Tim Berezny, Caredove (CTO)] 13:38:49  
Yeah.

[Tim Berezny, Caredove (CTO)] 13:38:50  
Should be.

[Dean Matthews (Infoway)] 13:38:50  
Okay.

[Thomas Zhou (AH)] 13:38:53  
Sorry. Just.

[Thomas Zhou (AH)] 13:38:55  
Adding a little bit, it just follow.

[Thomas Zhou (AH)] 13:38:57  
Teams, very.

[Thomas Zhou (AH)] 13:38:58  
Good suggestion in.

[Thomas Zhou (AH)] 13:39:00  
Guide and send it to guidance.

[Thomas Zhou (AH)] 13:39:04  
The the business

[Thomas Zhou (AH)] 13:39:06  
Sorry. Go ahead. And this

[Thomas Zhou (AH)] 13:39:08  
The the business section is very important.

[Thomas Zhou (AH)] 13:39:11  
And it.

[Thomas Zhou (AH)] 13:39:12  
Will be the how to see the anchor for the whole project. That's my.

[Thomas Zhou (AH)] 13:39:17  
Understanding.

[Thomas Zhou (AH)] 13:39:18

So.

[Thomas Zhou (AH)] 13:39:19  
We might really focus on the business section.

[Thomas Zhou (AH)] 13:39:23  
1st to me. Maybe.

[Thomas Zhou (AH)] 13:39:25  
For this project, and and once this scope.

[Thomas Zhou (AH)] 13:39:28  
With those?

[Thomas Zhou (AH)] 13:39:30  
Requirements.

[Thomas Zhou (AH)] 13:39:32  
About this business section be identified, and then we can move forward to the.

[Thomas Zhou (AH)] 13:39:36  
Other artifacts.

[Thomas Zhou (AH)] 13:39:38  
Components.

[Dean Matthews (Infoway)] 13:39:43  
Okay.

[Irfan Hakim] 13:39:48  
Also a reminder to folks on the call like this guide is public, and it is a work in progress right now. So if if you want to jump in and if you see some guidance that you feel like is missing, and what.

[Irfan Hakim] 13:40:04  
Like to see. You can.

[Irfan Hakim] 13:40:06  
Likely. Just.

[Irfan Hakim] 13:40:08  
Send us an email.

[Irfan Hakim] 13:40:10  
Thing is, or put it in the form.

[Irfan Hakim] 13:40:13  
For for sections for us to kind of create and.

[Irfan Hakim] 13:40:16

Trying to include, so that guidance we will try best to kind of go through that route as well.

[Irfan Hakim] 13:40:23

Oh, n.

[Dean Matthews (Infoway)] 13:40:23

And we have a so there's the other option is we do. We did create a Jira project for this.

[Dean Matthews (Infoway)] 13:40:31

So this is the the Csd project.

[Dean Matthews (Infoway)] 13:40:34

And we're following the other processes. So if you do want to provide feedback, you can follow that like link. If you already have a jira.

[Dean Matthews (Infoway)] 13:40:42

Id with us, then we can add you to that project if you do not have one.

[Dean Matthews (Infoway)] 13:40:47

You could follow that link. So from the.

[Dean Matthews (Infoway)] 13:40:50

From the guide.

[Irfan Hakim] 13:40:53

It's home at the very bottom.

[Dean Matthews (Infoway)] 13:40:55

It's.

[Dean Matthews (Infoway)] 13:40:57

That's for the project.

[Dean Matthews (Infoway)] 13:40:59

And here's the.

[Dean Matthews (Infoway)] 13:41:01

Where is it?

[Dean Matthews (Infoway)] 13:41:03

We did put the link here.

[Dean Matthews (Infoway)] 13:41:06

So this will take you.

[Dean Matthews (Infoway)] 13:41:08

Nope.

[Irfan Hakim] 13:41:11  
Oh, still like not working.

[Irfan Hakim] 13:41:13  
Team.

[Irfan Hakim] 13:41:14  
My apologies.

[Dean Matthews (Infoway)] 13:41:15  
This is just to the Jira project not to where they go to, so I'll I'll make sure that we send that as well.

[Irfan Hakim] 13:41:20  
I think the one above it.

[Irfan Hakim] 13:41:22  
Dean, if you go back.

[Irfan Hakim] 13:41:24  
The Guide.

[Irfan Hakim] 13:41:26  
This one would probably lead it. Leave them there.

[Irfan Hakim] 13:41:29  
Nope wrong. Never mind sorry.

[Dean Matthews (Infoway)] 13:41:37  
So we'll make sure that the link is provided there. I thought we had it on there. But we miss double checking that basically you can get to this page.

[Dean Matthews (Infoway)] 13:41:46  
Which gives you the process on

[Dean Matthews (Infoway)] 13:41:49  
How to create a.

[Dean Matthews (Infoway)] 13:41:50  
To let us know that you want to.

[Dean Matthews (Infoway)] 13:41:54  
Provide feedback, and we'll get you going.

[Dean Matthews (Infoway)] 13:41:55  
Similar to what they, what we've done on the other sites as well. So for anybody that's been using it on participating on the other projects. We're following the same process.

[Dean Matthews (Infoway)] 13:42:04

And then that'll let you create the Jira tickets or like said, drop us emails.

[Tim Berezny, Caredove (CTO)] 13:42:08  
That's exactly what she clicked on.

[Tim Berezny, Caredove (CTO)] 13:42:09  
Sorry I missed exactly what you clicked on in the guide to get to that page.  
Where's the.

[Tim Berezny, Caredove (CTO)] 13:42:13  
We'll do it.

[Tim Berezny, Caredove (CTO)] 13:42:14  
Pause for a second.

[Dean Matthews (Infoway)] 13:42:14  
I'm just gonna put it in the chat because I did links to the guy in the guide  
didn't work yet, so.

[Tim Berezny, Caredove (CTO)] 13:42:19  
Okay.

[Irfan Hakim] 13:42:21  
That's been amended. You can now go and click that link.

[Dean Matthews (Infoway)] 13:42:26  
On the home.

[Irfan Hakim] 13:42:28  
Yes, on the home. I believe that should work now.

[Tim Berezny, Caredove (CTO)] 13:42:32  
On Development Process section.

[Tim Berezny, Caredove (CTO)] 13:42:38  
Got it. Okay.

[Irfan Hakim] 13:42:39  
Yeah, is it working? Awesome?

[Dean Matthews (Infoway)] 13:42:43  
Yep.

[Dean Matthews (Infoway)] 13:42:46  
Thank you.

[Irfan Hakim] 13:42:48  
Problem.

[Tim Berezny, Caredove (CTO)] 13:42:49

No, we can use. We can use the Jira tickets, basically for suggestions to updates to the guide is that.

[Dean Matthews (Infoway)] 13:42:54

Yeah. And and it's this is the Csd similar to if you've done the

[Dean Matthews (Infoway)] 13:42:59

If you've been on part of the e-consultural projects.

[Dean Matthews (Infoway)] 13:43:03

It's the exact same template. We wanted to make it simple for everybody. So if you've been providing information.

[Dean Matthews (Infoway)] 13:43:08

And

[Dean Matthews (Infoway)] 13:43:11

Tickets on erefall. Same process, you'll see the same list of everything. It's just the Csd Guide instead of the referral guide.

[Dean Matthews (Infoway)] 13:43:17

So it's not a loop, not a new process, or anything that you have to learn.

[Tim Berezny, Caredove (CTO)] 13:43:22

Maybe shout out to Mark. I don't know if we have this development process on the euro Guide.

[Tim Berezny, Caredove (CTO)] 13:43:27

And a link to our Jira page. If we don't have it, it might be useful.

[Tim Berezny, Caredove (CTO)] 13:43:30

As well over there.

[Tim Berezny, Caredove (CTO)] 13:43:39

Or Alex, or whoever you refer.

[Mark Fernandes] 13:43:40

Yeah, I agree, Tim, we don't have the

[Mark Fernandes] 13:43:43

On the simplify page. We don't have a link to the Jira.

[Tim Berezny, Caredove (CTO)] 13:43:46

Yeah.

[Tim Berezny, Caredove (CTO)] 13:43:48

Looks looks useful.

[Dean Matthews (Infoway)] 13:43:54

Any other comment, feedback.

[Dean Matthews (Infoway)] 13:43:57  
On the content.

[Dean Matthews (Infoway)] 13:44:01  
If not, I do.

[Annie Ooi] 13:44:02  
I have a quick comment, which I'll probably also submit on Jira.

[Annie Ooi] 13:44:07  
So on the patient summary guide there is like a section that has the key differences between Pst and Ips.

[Annie Ooi] 13:44:16  
Would we be able to get like a similar section on the I got here between Cac and Mcsd.

[Irfan Hakim] 13:44:24  
Could you.

[Irfan Hakim] 13:44:26  
if you get the chance could.

[Irfan Hakim] 13:44:28  
Post that that.

[Irfan Hakim] 13:44:30  
Page link in the cut in in the chat. We would love to take a look and.

[Dean Matthews (Infoway)] 13:44:36  
We will definitely look at that. If you can give us the the link.

[Irfan Hakim] 13:44:42  
Awesome.

[Dean Matthews (Infoway)] 13:44:42  
Thanks. Annie.

[Dean Matthews (Infoway)] 13:44:46  
Any other comments on Content.

[Annie Ooi] 13:44:50  
Okay. Sounds good.

[Dean Matthews (Infoway)] 13:44:52  
Okay, so.

[Dean Matthews (Infoway)] 13:44:54  
Just going to ask one quick question.

[Dean Matthews (Infoway)] 13:44:58

Did people like this look one thing that we would keep is, if you notice when you scroll, the top bar stays.

[Dean Matthews (Infoway)] 13:45:05

So that you never have to keep scrolling all the way to the top to get to the menu, that the menu again.

[Dean Matthews (Infoway)] 13:45:10

And the sidebar.

[Dean Matthews (Infoway)] 13:45:13

Does actually let you.

[Dean Matthews (Infoway)] 13:45:15

If you go to one that has.

[Dean Matthews (Infoway)] 13:45:18

And if we go to like service.

[Dean Matthews (Infoway)] 13:45:21

It lets you scroll to the different sections.

[Dean Matthews (Infoway)] 13:45:27

Can only stop, it starts at the top. So the terminology bindings the top one. That's why that one's highlighted.

[Dean Matthews (Infoway)] 13:45:32

But it does let you scroll through. Does this look? And having this top bar.

[Dean Matthews (Infoway)] 13:45:38

Stay.

[Dean Matthews (Infoway)] 13:45:40

If that was in case on this look.

[Dean Matthews (Infoway)] 13:45:42

Is that something that's.

[Dean Matthews (Infoway)] 13:45:44

Makes sense to people.

[Tim Berezny, Caredove (CTO)] 13:45:48

I really like the top bar sting. I think that's.

[Tim Berezny, Caredove (CTO)] 13:45:51

Think that's a good idea.

[Dean Matthews (Infoway)] 13:45:54

So we'll keep that, and then the sidebar.

[Dean Matthews (Infoway)] 13:45:58

Sidebar works when there's lots of content. Cause you can get there like you get some of these pages that get very long.

[Dean Matthews (Infoway)] 13:46:04

And.

[Dean Matthews (Infoway)] 13:46:07

Don't think we have many of them right now, but it does let you kind of get there really quickly, too. So you're not having to even scroll once you're in the page.

[Tim Berezny, Caredove (CTO)] 13:46:13

I also like Sidebar.

[Dean Matthews (Infoway)] 13:46:14

So.

[Dean Matthews (Infoway)] 13:46:16

Okay. Let's go.

[Tim Berezny, Caredove (CTO)] 13:46:16

I like them both.

[Dean Matthews (Infoway)] 13:46:16

Okay, so we'll keep both. And does this look matching more like the the 5 HL. 7 book. Look with the red.

[Dean Matthews (Infoway)] 13:46:26

Like. Obviously, we'll use the the H0. 7 Canada affiliation on logo. But the rest of it looks okay.

[Dean Matthews (Infoway)] 13:46:31

If we followed that look.

[Tim Berezny, Caredove (CTO)] 13:46:35

Just like color scheme. So it's like layout of what you just showed us. But with the color scheme of this.

[Dean Matthews (Infoway)] 13:46:39

Yeah, like, it'd be a top bar like this. So the.

[Dean Matthews (Infoway)] 13:46:43

So, rather than having this.

[Dean Matthews (Infoway)] 13:46:46

And the the hard colors, like the the dark red.

[Dean Matthews (Infoway)] 13:46:51

Bit more.

[Dean Matthews (Infoway)] 13:46:52  
Subdued, so titles would be blocked instead of red.

[Dean Matthews (Infoway)] 13:46:54  
More of this color scheme.

[Dean Matthews (Infoway)] 13:46:56  
And and the smaller header at the top.

[Tim Berezny, Caredove (CTO)] 13:46:57  
I mean, that's.

[Tim Berezny, Caredove (CTO)] 13:46:59  
That I mean, that just comes down to whatever standards you want to implement for.

[Tim Berezny, Caredove (CTO)] 13:47:03  
Info away. They're both. They both work.

[Dean Matthews (Infoway)] 13:47:06  
Okay, so we'll we'll take that back and.

[Dean Matthews (Infoway)] 13:47:09  
See what the team says internally, then.

[Dean Matthews (Infoway)] 13:47:12  
Okay.

[Dean Matthews (Infoway)] 13:47:15  
Alex, thank you.

[Dean Matthews (Infoway)] 13:47:22  
Alex just shared another link. So that's great. Thanks.

[Dean Matthews (Infoway)] 13:47:28  
Copy it out before my.

[Dean Matthews (Infoway)] 13:47:29  
Chat goes away.

[Dean Matthews (Infoway)] 13:47:33  
Any other comments along the way. We've got few more minutes left.

[Dean Matthews (Infoway)] 13:47:40  
Today. I think we covered everything. Did one. Did we miss anything.

[Dean Matthews (Infoway)] 13:47:43  
Don't think so.

[Irfan Hakim] 13:47:45

Nope. To my knowledge.

[Dean Matthews (Infoway)] 13:47:49

Okay.

[Dean Matthews (Infoway)] 13:47:51

No one else has anything else.

[Dean Matthews (Infoway)] 13:47:54

We are looking to get.

[Dean Matthews (Infoway)] 13:47:57

All this? Have a draft ready for review. And.

[Dean Matthews (Infoway)] 13:48:03

So basically for.

[Dean Matthews (Infoway)] 13:48:07

A.

[Dean Matthews (Infoway)] 13:48:08

Pre-draft.

[Dean Matthews (Infoway)] 13:48:09

Version, for.

[Dean Matthews (Infoway)] 13:48:11

October. So, having everybody's feedback and.

[Dean Matthews (Infoway)] 13:48:16

Have that version ready for October does give us a little bit of time, hoping to have it a lot sooner than that, so.

[Dean Matthews (Infoway)] 13:48:21

Do you have time? Please give us your feedback, and we will be.

[Dean Matthews (Infoway)] 13:48:26

This is a continuous build. So.

[Dean Matthews (Infoway)] 13:48:30

Will just be kept. Keep adding content as the changes come in. So you won't have to go to any different link. Just the current. One will just keep maintaining the.

[Dean Matthews (Infoway)] 13:48:39

The content as we go along. So please take a look, and

[Dean Matthews (Infoway)] 13:48:45

Appreciate the help.

[Dean Matthews (Infoway)] 13:48:47  
And thanks for all the comments today. They were great.

[Tim Berezny, Caredove (CTO)] 13:48:50  
Yeah, so I can get looking good.

[Dean Matthews (Infoway)] 13:48:53  
Thank you.

[Tim Berezny, Caredove (CTO)] 13:48:53  
Thanks for plugging through on this.

[Dean Matthews (Infoway)] 13:48:56  
If nothing else. I think we can give you a few minutes back.

[Dean Matthews (Infoway)] 13:49:00  
And then we will. We did have the transcription today. So we're trying that out.  
So, thanks to Sabrina for getting.

[Dean Matthews (Infoway)] 13:49:07  
All the.

[Dean Matthews (Infoway)] 13:49:09  
Meeting setup and the notes, and doing all the background work that make sure that  
everybody gets all the information. So call up to Sidrina, so appreciate that.

[Dean Matthews (Infoway)] 13:49:17  
And with that I will let you go.

[Dean Matthews (Infoway)] 13:49:20  
Have a good day and good weekend. Everybody.

[Tim Berezny, Caredove (CTO)] 13:49:21  
Thank you.

[Tim Berezny, Caredove (CTO)] 13:49:22  
Okay.

[Muhammad] 13:49:23  
Thanks. Doing bye.
