

*Transforming energy use  
in America's Heartland  
since 1983.*

**Metropolitan Energy Center (MEC)** empowers communities in our region to adopt and advocate for cleaner, healthier ways to use energy.

## WHY ENERGY?

- **Our health, wallets, and neighborhoods** are affected by the way we use power.
- **Our buildings use energy every day:** Power cools and heats our homes and businesses. It's how we cook and charge our phones.
- **Transportation is vital to our society.** It's the way goods make it into our stores and how our children make it to school.

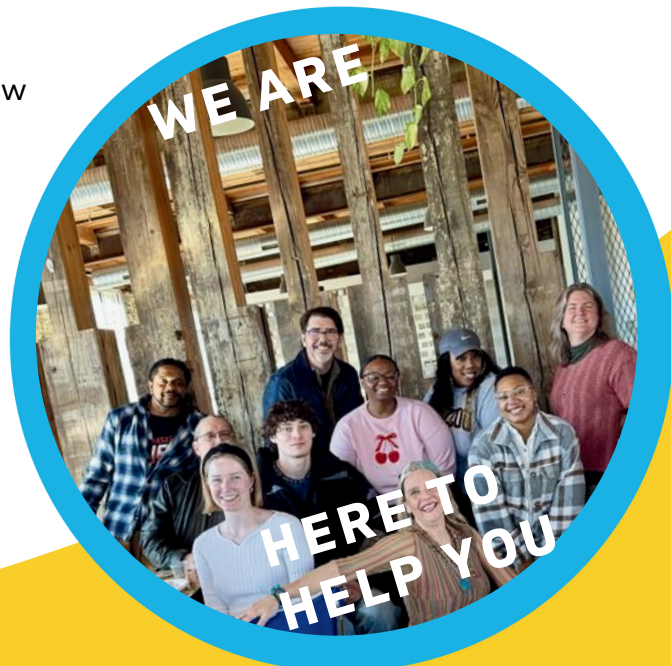

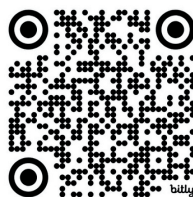

## OUR IMPACT

- **Clean Transportation and Streetlight Charging:** On-the-ground projects that make business sense, reduce pollution and expand electric vehicle charging.
- **Healthier Homes and Buildings:** Through education and advocacy, we work for homes that shelter and protect our families.
- **Workforce Training:** We equip workers with skills and business know-how to bring better solutions to their communities.

# REAL STORIES, REAL IMPACT.

*Everyone deserves a future with clean air, safe homes and a healthy planet— in the Kansas City region and beyond.*

## HEALTHY HOMES, HEALTHY LIVES

A visit from the Children's Mercy Healthy Homes program revealed the connection between Nina's emergency asthma attacks and her home's poor air quality. MEC's connection to weatherization services transformed her home into a safe haven, drastically improving her health and well-being

## A RIDE WITH A NEW VIBE

Leading the charge, MEC brought federal funds and project management to bring the KCI airport new electric shuttle buses. Now KCI's employees and thousands of travelers can feel, smell and hear the tangible benefits of clean transportation, saving money and setting nationwide precedents.

# YOUR ACTIONS MAKE A BETTER FUTURE.

- **Energy Upgrades:** Enhance your home or workplace with effective energy-efficient improvements. We connect you to the best rebates, deals, and local experts.
- **Clean Transportation:** We help you evaluate transportation options at your home or workplace to switch to cleaner, more efficient fueling.
- **Advocate for Change:** Quality housing is a basic human right, and transportation shouldn't be polluting the air we breathe. Your voice can enact policies that ensure clean, efficient energy for all.

*Explore how you can make a difference.*
