Person Assigned	David Clunie mailto:dclunie@dclunie.com
Submitter Name	David Clunie mailto:dclunie@dclunie.com
Submission Date	2024/08/09
Correction Number CP-2438	
Log Summary: Update DICOM to reflect changes in IHTSDO SNOMED CT-DICOM Subset for JUL 2024 INT Release	
Name of Standard	
PS3.16	

Rationale for Correction:

The following concepts have been inactivated in the July 2024 INT release:

- 108290001 Radiation oncology AND/OR radiotherapy (procedure)
- 314122007 Maintenance therapy (procedure) - CRS#964190 - replaced with cancer-specific concept that is less vague wrt. application, 1345242003 Maintenance antineoplastic therapy (regime/therapy)
- 413581001 Asian or Pacific islander (racial group) - we will continue to use since disagree w. SNOMED
- 414481008 Indian (racial group) - we will continue to use since disagree w. SNOMED
- 413490006 American Indian or Alaska native (racial group) - we will continue to use since disagree w. SNOMED
- 413600007 Australian aborigine (racial group) - we will continue to use since disagree w. SNOMED
- 284355001 Structure of left ventricle anterior segment (body structure)
- 284357009 Structure of left ventricle inferior segment (body structure)
- 284358004 Structure of left ventricle lateral segment (body structure)
- 284356000 Structure of left ventricle septal segment (body structure)|
- 103716009 Placement of stent (procedure)
- 307279007 Prosthetic replacement of heart valve (procedure) - replacement omits "prosthetic" aspect - reconsideration approved and will be reactivated - CRS#964191
- 33272004 Structure of myocardium of posterolateral region (body structure) - we requested reconsideration of this inactivation CRS#964192; SNOMED's suggested replacements do not seem equivalent:
 - 264846001 Structure of basal inferior segment of left cardiac ventricle (body structure)
 - 16239001 Structure of myocardium of inferolateral region of left ventricle (body structure)|
 - See also "<https://confluence.ihtsdotools.org/display/cmag/Revision+of+segmental+models+of+the+cardiac+wall>"
 - See also "<https://confluence.ihtsdotools.org/display/IAP/Cardiac+wall+and+segment+models>"
 - SNOMED commented: *"I could not find references for the posterolateral region apart from the segment model of the left ventricle. Because of the potential ambiguity of the word "posterior" for the anatomy of the heart, it is not clear about the specific region. From a gross anatomy aspect, posterior (base) surface of the heart, the true cardiac base, is somewhat quadrilateral, with curved lateral extensions...formed mainly by the left atrium, and only partly by the posterior part of the right atrium. This description of the anatomical base reflects the usual position of the heart in the thorax. Would a new concept posterior (base) surface of heart be suitable for the requirement? Note, currently posterior surface is an incorrect synonym of 60383004 |Structure of diaphragmatic surface of heart (body structure)|"*
- Action in absence of feedback from cardiologists - remove from CID 3718 with no replacement
- 72542009 Structure of myocardium of diaphragmatic region (body structure) - we requested reconsideration of this inactivation CRS#964193; SNOMED's suggested replacements do not seem equivalent:
 - 1335800009 Structure of myocardium of inferior region of left and right ventricles (body structure)
 - 367598003 Structure of myocardium of inferior region of left ventricle (body structure)
 - 60383004 Structure of diaphragmatic surface of heart (body structure)|
 - See also "<https://confluence.ihtsdotools.org/display/cmag/Revision+of+segmental+models+of+the+cardiac+wall>"
 - See also "<https://confluence.ihtsdotools.org/display/IAP/Cardiac+wall+and+segment+models>"

- SNOMED commented: *"the diaphragmatic region could be interpreted from two aspects. From the gross anatomy aspect, the inferior (diaphragmatic) surface of the heart is largely horizontal. The inferior surface of the heart gently slopes anteroinferiorly towards the cardiac apex. It is formed by the ventricles (primarily the left) and rests mainly on the central tendon but also, apically, on a small area of the left muscular part of the diaphragm. It is represented by the new concept myocardium of inferior region of left and right ventricles to be explicit. This is different from the inferior region in the segment model of the cardiac wall that comprises the apical, mid and basal inferior segments of the left ventricle only. If the usage in DICOM is not about segment, the new concept should be the replacement. Otherwise, it could be confused with the inferior region in the segment model that only involves the left ventricle."*

10

- Action in absence of feedback from cardiologists - remove from CID 3718 with no replacement

11

- 27483000 Diagnostic radiography with contrast media (procedure) - see also CP 2439

12

- 128953001 Catheterization of both left and right heart without graft (procedure) - we requested reconsideration of this inactivation - reactivated CRS#964194 - so no change in this CP

13

14

- 133874006 Selective fetal reduction (procedure)

15

- 64318009 Diagnostic radiography, stereotactic localization (procedure)

16

- 19776001 Decreased size (finding) - we requested reconsideration of this inactivation - reactivated CRS#964195 - so no change in this CP

17

18

- 4563007 Hospital admission, transfer from other hospital or health care facility (procedure)

19

- 15415002 Injection of amnion (procedure)

20

- 255046005 Neuroendocrine tumor (disorder)

21

- 12169001 Granular cell tumor (morphologic abnormality)

22

- 92652009 Carcinoma in situ of male breast (disorder) - Japanese translation of original and replacement lacks "in situ" concept (added to French)

23

24

- 92248004 Benign neoplasm of nipple of female breast (disorder)

25

- 248536006 Finding of functional performance and activity (finding)

26

- 373270004 Substance with penicillin structure and antibacterial mechanism of action (substance)

27

- 421921003 Cannabinoid (substance) - not actually used in DICOM, but add its replacement anyway (to CID 6089 Substance)

28

Correction Wording:

Amend DICOM PS3.16 as follows (changes to existing text are bold and underlined for additions and ~~struckthrough~~ for removals):

Retired Code Value	Code Meaning	Replacement Code	Notes
53438000	Radiation therapy	408290004 <u>1287742003</u>	Replacement code has meaning of " Radiation oncology AND/OR radiotherapy (procedure)". Retired code is inactive in SNOMED CT.

Add new retired concepts to DICOM PS3.16:

J SNOMED Retired Codes

Table J-1. SNOMED Codes Retired from DICOM Use

Retired Code Value	Code Meaning	Replacement Code	Notes
108290001	Radiation therapy	1287742003	Replacement code has meaning of "Radiotherapy (procedure)". Retired code is inactive in SNOMED CT.
284355001	Left ventricle anterior segment	1335839000	Replacement code has meaning of "Structure of myocardium of anterior region of left ventricle (body structure)". Retired code is inactive in SNOMED CT.
284357009	Left ventricle inferior segment	367598003	Replacement code has meaning of "Structure of myocardium of inferior region of left ventricle (body structure)". Retired code is inactive in SNOMED CT.

Retired Code Value	Code Meaning	Replacement Code	Notes
284358004	Left ventricle lateral segment	1335824001	Replacement code has meaning of "Structure of myocardium of lateral region of left ventricle (body structure)". Retired code is inactive in SNOMED CT.
284356000	Left ventricle septal segment	1335840003	Replacement code has meaning of "Structure of myocardium of septal region of left ventricle (body structure)". Retired code is inactive in SNOMED CT.
103716009	Stent placement	1296925008	Replacement code has meaning of "Insertion of stent (procedure)". Retired code is inactive in SNOMED CT.
33272004	myocardium of posterolateral region		No replacement. Retired code is inactive in SNOMED CT.
72542009	myocardium of diaphragmatic region		No replacement. Retired code is inactive in SNOMED CT.
133874006	Fetocide (selective reduction)	265633004	Replacement code has meaning of "Selective destruction of fetus (procedure)". Retired code is inactive in SNOMED CT.
64318009	Diagnostic radiography, stereotactic localization	428907005	Replacement code has meaning of "Wire localization of lesion of breast using plain X-ray guidance (procedure)". Retired code is inactive in SNOMED CT.
4563007	Transfer	308292007	Replacement code has meaning of "Transfer of care (procedure)". Retired code is inactive in SNOMED CT.
15415002	Amnioinfusion [injection of amnion]	1269276008	Replacement code has meaning of "Injection of substance into amniotic cavity (procedure)". Retired code is inactive in SNOMED CT.
255046005	Neuroendocrine tumor	1290125003	Replacement code has meaning of "Neuroendocrine neoplasm, malignant (disorder)". Retired code is inactive in SNOMED CT.
12169001	Granular cell tumor	404035005	Replacement code has meaning of "Granular cell tumor (disorder)". Retired code is inactive in SNOMED CT.
92652009	Carcinoma in situ of male breast	189336000	Replacement code has meaning of "Carcinoma in situ of breast (disorder)". Retired code is inactive in SNOMED CT.
92248004	Benign neoplasm of nipple of female breast (Nipple adenoma)	1306316005	Replacement code has meaning of "Benign neoplasm of nipple (disorder)". Retired code is inactive in SNOMED CT.
248536006	Functional performance and activity	423690003	Replacement code has meaning of "General physical performance status (observable entity)". Retired code is inactive in SNOMED CT.

Retired Code Value	Code Meaning	Replacement Code	Notes
373270004	Penicillin antibiotic	764146007	Replacement code has meaning of "Substance with penicillin structure (substance)". Retired code is inactive in SNOMED CT.
314122007	Maintenance therapy	1345242003	Replacement code has meaning of "Maintenance antineoplastic therapy (regime/therapy)". Retired code is inactive in SNOMED CT.
