

DICOM Correction Proposal

STATUS	Letter Ballot
Date of Last Update	2024/06/03
Person Assigned	Silvia Winkler
Submitter Name	Silvia Winkler (silvia.winkler@sigmasoft.at)
Submission Date	2024/01/04

Correction Number	CP-2387
Log Summary:	New Context Group for Waveform Modalities
Name of Standard	PS3.16
Rationale for Correction:	<p>For some purposes (e.g. in the Waveform Library Entry in the Waveform Annotation SR) it could be useful to refer to a Context Group containing just waveform modalities.</p> <p>This CP proposes to move these waveform modalities from CID 29 to a separate Context Group and include this in Context Group 29.</p> <p>Modality code AU is now contained in CID 32. Non-Acquisition Modality, but only with the meaning “Basic Voice Audio”. AU might also be “General Audio” and “Real-time Audio. Table D-1. also defines AU as “Audio”, so the Code Meaning in CID 32 shall be corrected.</p>
Correction Wording:	

Change PS3.16 CID 29 to factor out the Waveform modalities to a new CID and include it:
