

# 5 Ways Utility Companies Are Using Geographic Information Insights

1

## MONITOR & REPORT

Remotely monitor and troubleshoot your industrial assets with *at-a-glance* precision.

2

## CONDITION-BASED MONITORING

Manage performance of your key, business-critical electric utility assets.

3

## SAVE MAINTENANCE TIME, LABOR, & COSTS

Stop crews from crisscrossing vast service areas with real-time GPS location tracking.

4

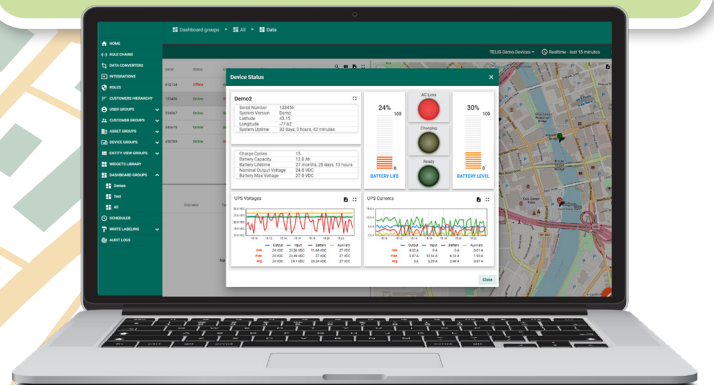

## IMPROVE CUSTOMER SERVICE & SATISFACTION

Receive alerts on area asset conditions **BEFORE** a failure or power outage occurs.

5

## VIEW DATA ANALYTICS

Collect & visualize location data aggregated to provide significant insights for IIoT device management.
