IBIM CAMPUS
BUILDING A NEW FUTURE IN ISRAEL

Want to turn the Zionist dream into reality? Come to Ibim Campus!
Ibim Campus is located in Israel's Negev, in a green and welcoming community near the city of Sderot. It offers you a chance to settle in a young, family-oriented environment, with the tools to succeed at work, studies, and personal life. Now is your time to study, grow professionally, and take part in an important national mission — strengthening and rebuilding the Negev, and leading a new future for Israel.

What's so great about Ibim? Everything!
From the fun atmosphere and young, opportunity-filled community, to unique housing solutions and educational and professional tools to help you thrive in Israel:

Employment and Academia
If you have a background in engineering, you can join a professional training program with job placement support in the South — all within 9 months. Interested in high-tech project management? Join a unique 6-month training program in partnership with Elevation and get ready to work in the high-tech industry. Want to do a pre-academic program or pursue a Bachelor's or Master's degree? You can study at Sapir College with special scholarships, even full funding, plus ongoing personal support!

With absorption services for the whole family — including nearby schools with transportation, Hebrew ulpan, and year-round support — we're here to ensure a soft landing.
At the end of your first year at the campus, you can choose to stay in the area (which is designated as a National Priority Zone with special benefits) or relocate elsewhere in Israel.

So come join us, benefit from unique absorption solutions, and take part in building our shared future!
