

This document describes the new features that are being implemented as part of the General Availability release for the Aspect Developer Portal.

New Feature Updates

The table below reflects the new Aspect Developer Portal features for November 2025.

- The **New Feature** column lists the name or description of the new feature.
- The **Feature Audience** column shows who can access each feature - either employees, admins, or all users. Contact Aspect Customer Care for availability details.
- The **Enablement Method** column indicates how features are deployed - either automatically or through the Aspect account team.
- The **Functional Impact** column describes the functional benefits of the new feature.
- The **Documentation** column links to available documentation, which may be published up to two weeks after feature release.

Note: This is a living document and subject to change. Customer features may be added or removed prior to official rollout.

Aspect Developer Portal

New Feature	Feature Audience	Enablement Method	Functional Impact	Documentation
Apps Workspace	Admin	Automatic	<ul style="list-style-type: none"> • Manage all your applications in one centralized location with intuitive create, view, edit, and delete functionality. Enhanced security features include auto-generated credentials that can only be viewed once at creation. 	Aspect Developer Portal User Guide
API Catalog	Admin	Automatic	<ul style="list-style-type: none"> • Access comprehensive documentation for all available API endpoints with real-time test and production data capabilities, complete with built-in version control. 	Aspect Developer Portal User Guide
Sandbox Environment	Admin	Automatic	<ul style="list-style-type: none"> • Test your integrations safely in an isolated environment before deploying to production, eliminating risks to live data. 	Aspect Developer Portal User Guide
