Canadian Institute
for Health Information
Institut canadien
d'information sur la santé

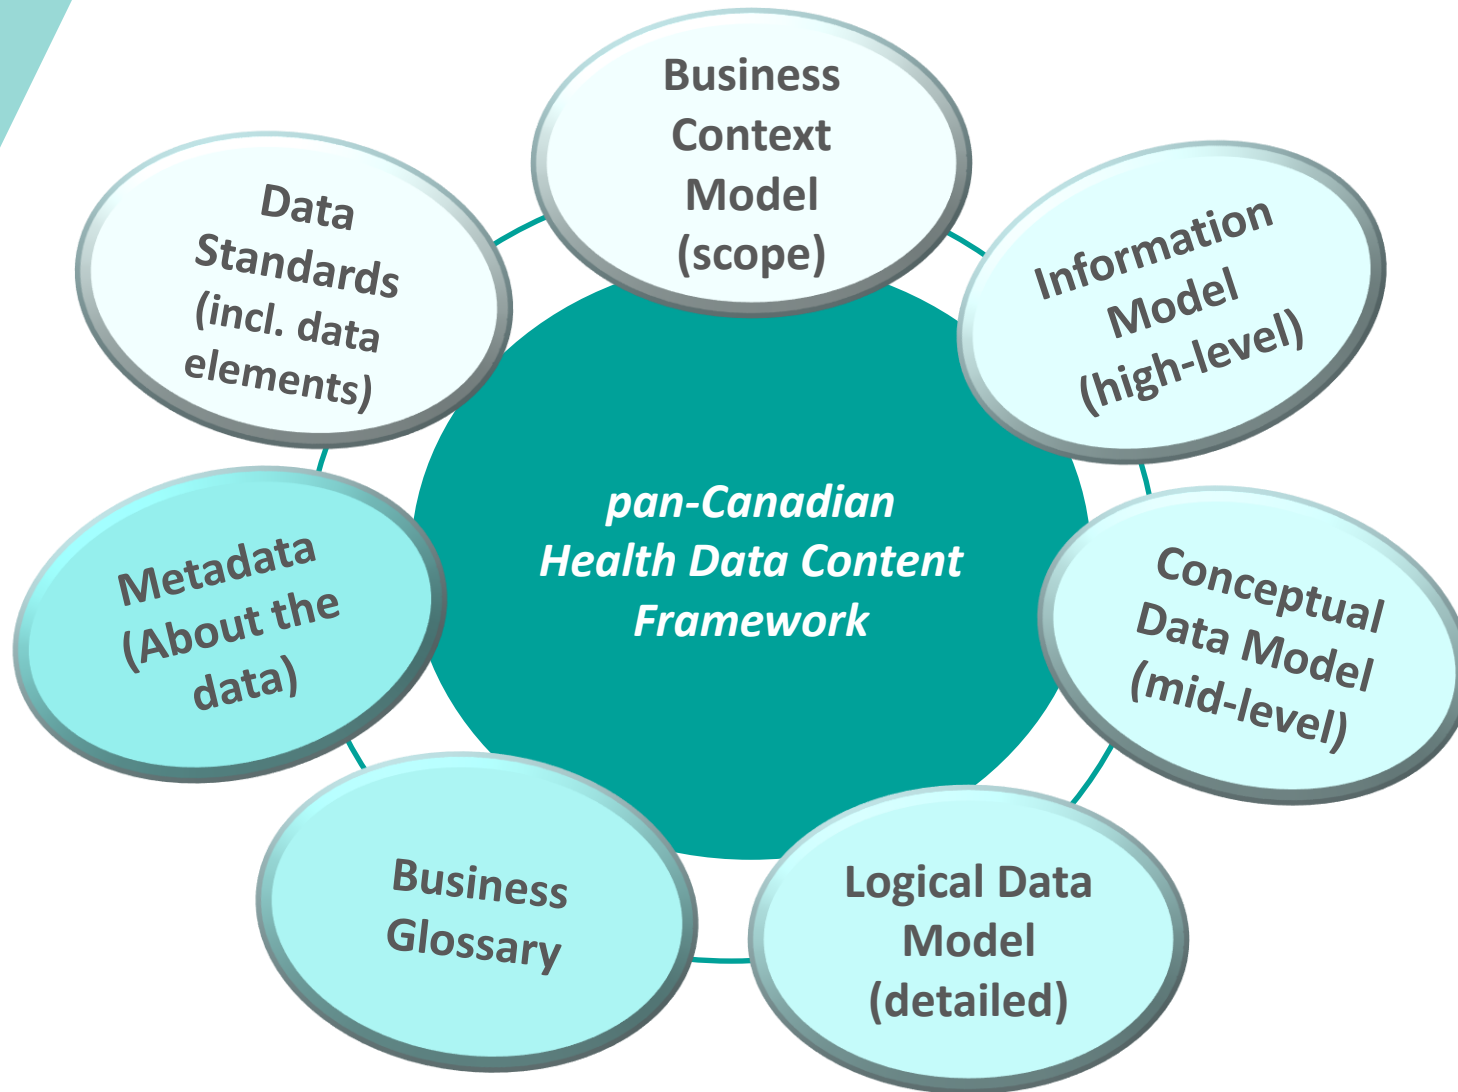

We have two current, inter-related streams of activity

Iterative process to identify the health categories, data elements and value sets necessary to support person-centric care

Iterative process to establish the data architecture necessary to properly structure the data standards to enable data flow across the health care system

This work will result in 7 deliverables

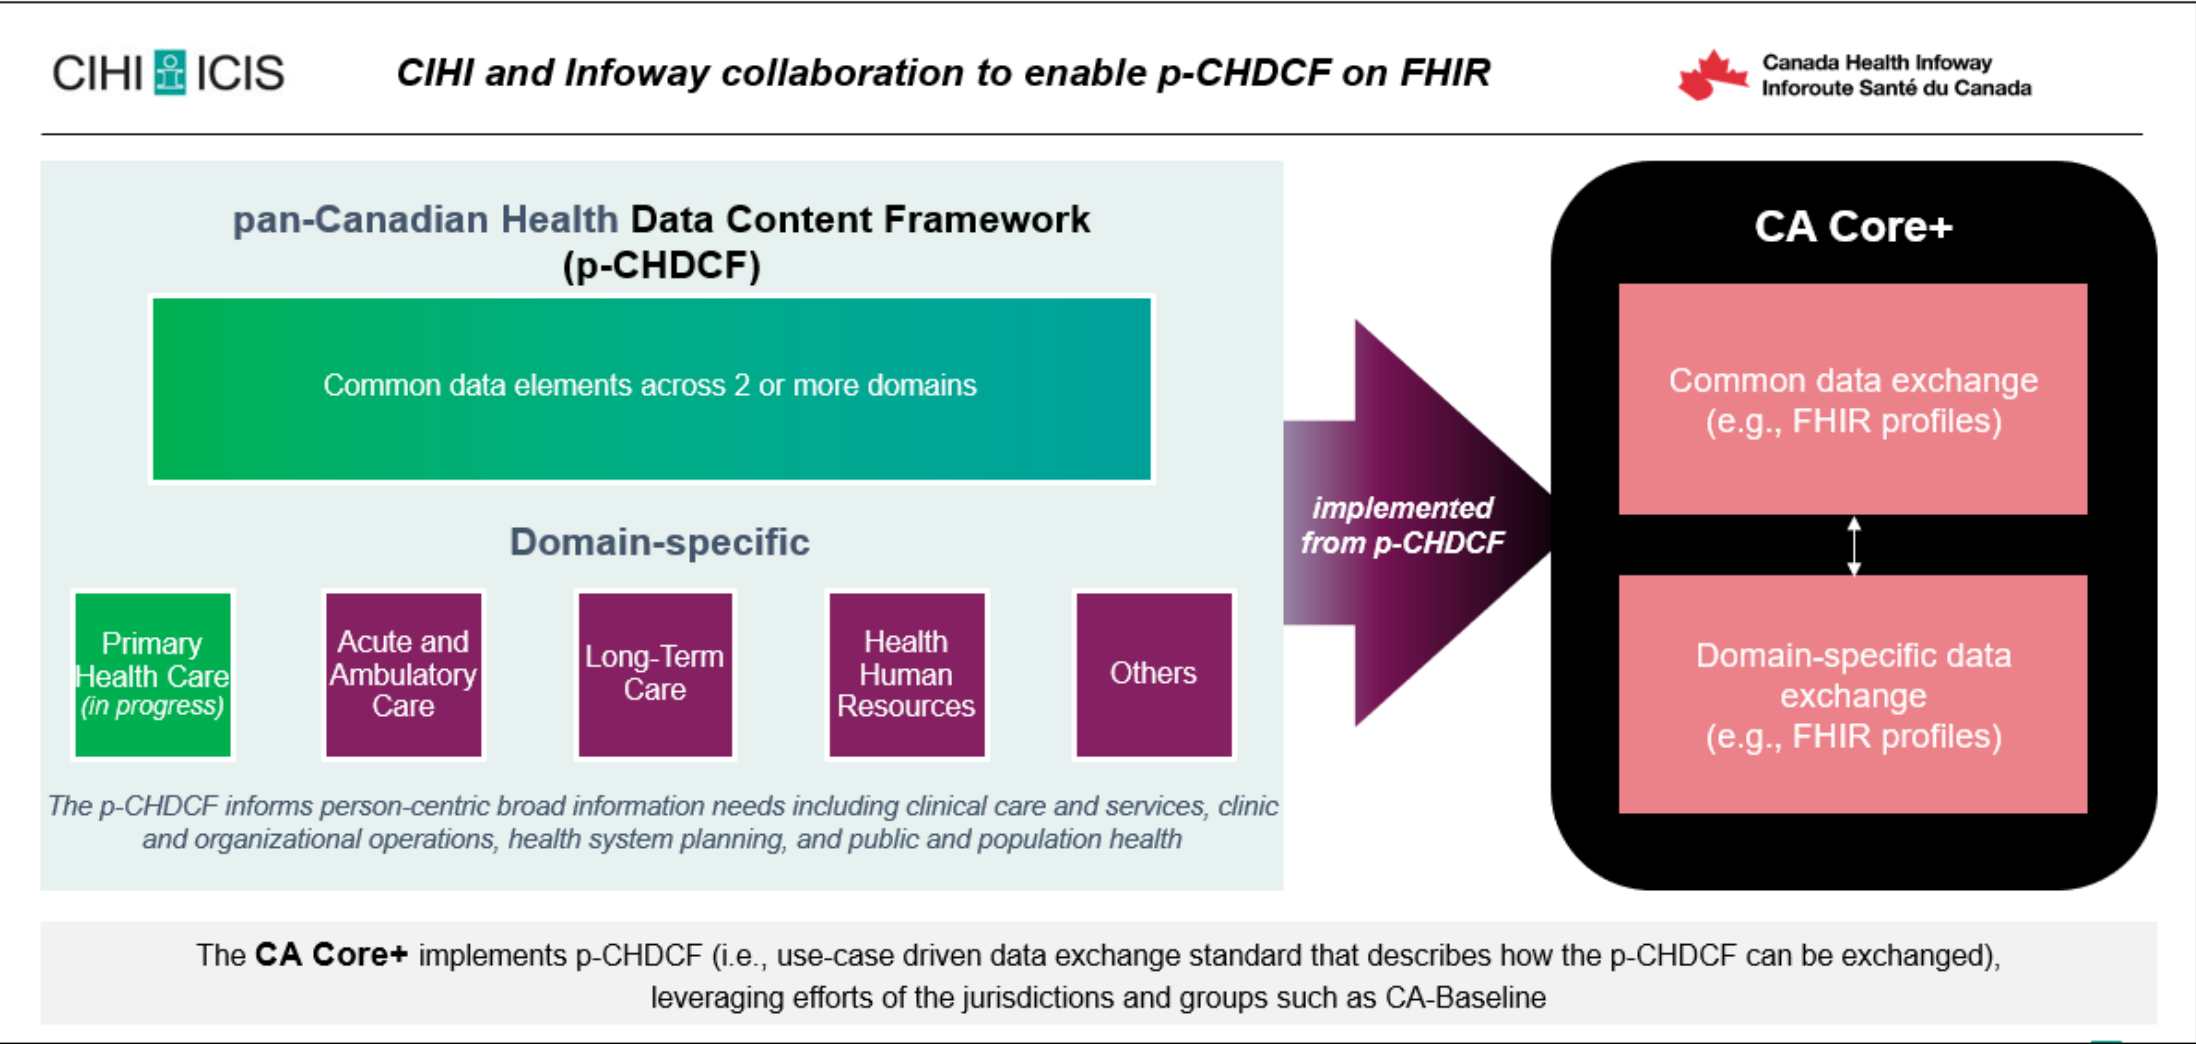

Together, our deliverables form a single, cohesive CIHI product, the:

pan-Canadian Health Data Content Framework

What are we working towards?

A pan-Canadian Health Data Content Framework on FHIR

Canadian Institute for Health Information

Better data. Better decisions. Healthier Canadians.
