

This document describes the new features that are being implemented as part of the February 2026 Release for the Aspect Developer Portal. This release introduces Aspect's first self-serve automated HRIS integration with BambooHR, which updates WFM data records based on changes made in the BambooHR system.

## New Feature Updates

The table below reflects the new Aspect Developer Portal features for February 2026.

- The **New Feature** column lists the name or description of the new feature.
- The **Feature Audience** column shows who can access each feature - either employees, admins, or all users. Contact Aspect Customer Care for availability details.
- The **Enablement Method** column indicates how features are deployed - either automatically or through the Aspect account team.
- The **Functional Impact** column describes the functional benefits of the new feature.
- The **Documentation** column links to available documentation, which may be published up to two weeks after feature release.

*Note: This is a living document and subject to change. Customer features may be added or removed prior to official rollout.*

## Aspect Developer Portal

New Feature	Feature Audience	Enablement Method	Functional Impact	Documentation
HRIS Data Connect	Admin/ Developer	Automatic	<ul style="list-style-type: none"> <li>• One-way integration that syncs employee time-off types and balances from HR systems to Aspect WFM.</li> <li>• Fully automates the flow from HRIS to Aspect.</li> <li>• Zero IT or R&amp;D investment required.</li> <li>• Guided configuration (Connect → Map → Sync).</li> <li>• One-time setup keeps data automatically synced.</li> <li>• Eliminates discrepancies between Employee hours scheduled and worked.</li> <li>• Reduces compliance risk and potential labor law related disputes.</li> </ul>	<a href="#">Aspect Developer Portal User Guide</a>

## Known Issues and Workarounds
