

BE A DRIVING **FORCE!**

GEEKS **FOR** KIDS

Gives Kids with Movement Limitations the #Power2Play

LEARN's Geeks for Kids program builds custom, electric cars and other assistive devices for kids with movement limitations; we empower kids to explore their world independently - often for the first time in their lives. With this freedom, they are no longer sitting on life's sidelines, passive observers from strollers and wheelchairs.

Plus, we make our kids feel "cool" with a hot rod that excites and engages their peers and encourages them to play together. "Research shows kids' interaction with [these rideable] cars helps advance developmental, physical, social, language and cognitive skills," reports Sam Logan, assistant professor at Oregon State University's College of Public Health and Human Sciences. Since its launch in 2019, we have gotten 405 kids racing. And, we will hope to get another 80+ kids racing this year.

You can make a difference!

Volunteer, Sponsor, Donate or Refer a Child
