

Accessing the Pan-Canadian Health Data Content Framework HTML Page

This document provides step-by-step instructions for accessing the pan-Canadian Health Data Content Framework HTML page. The example below is for the Business Context Model, but the following steps apply to all the zip files you may download.

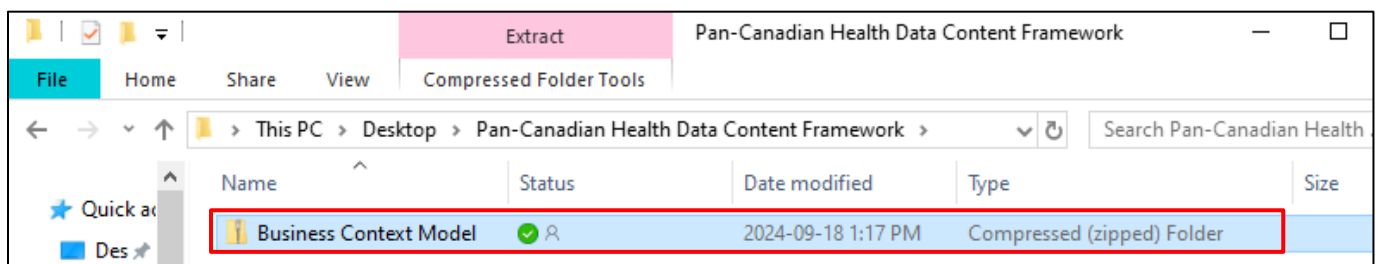

1. On your desktop, create a new folder.

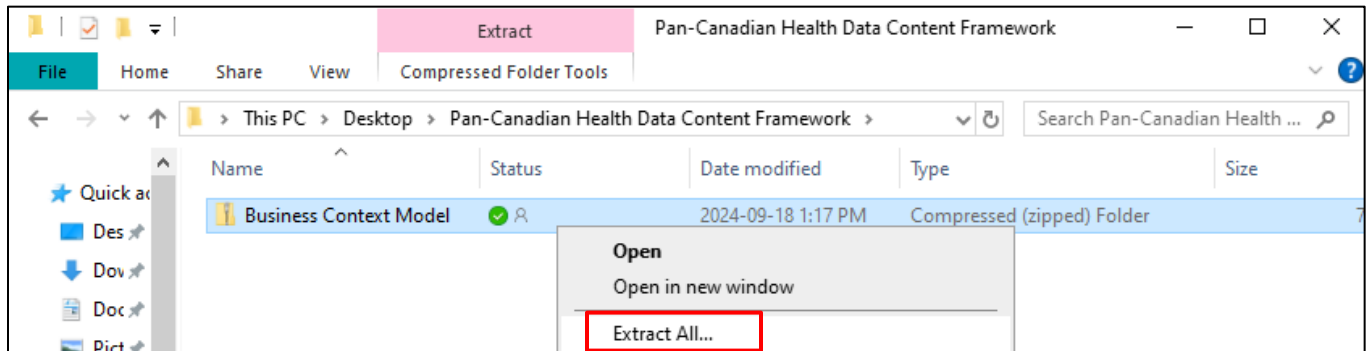

2. Name the folder "Pan-Canadian Health Data Content Framework."

3. Save a copy of the zipped file you downloaded from InfoCentral.

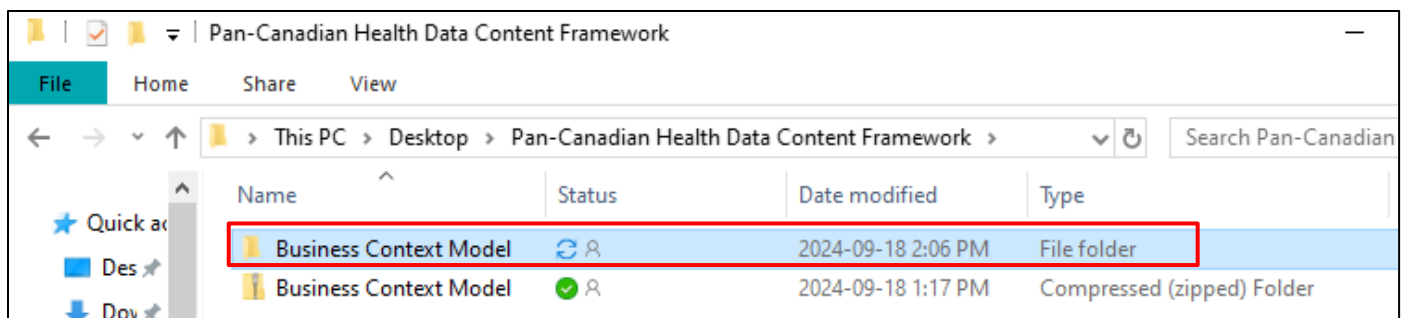

4. Right-click the zipped file and select **Extract All...**

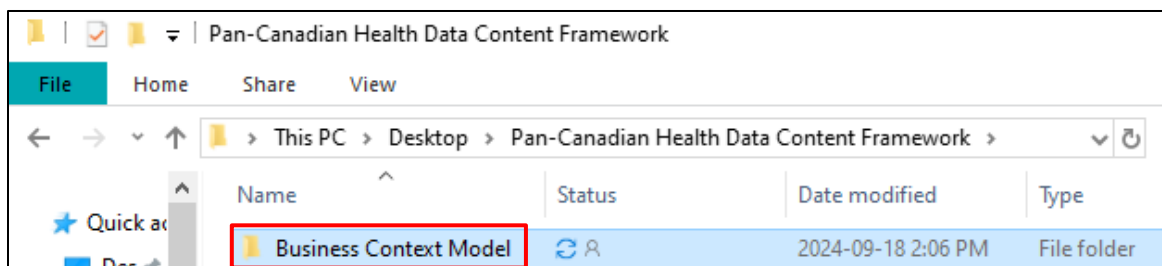

Note: You should now have 2 folders.

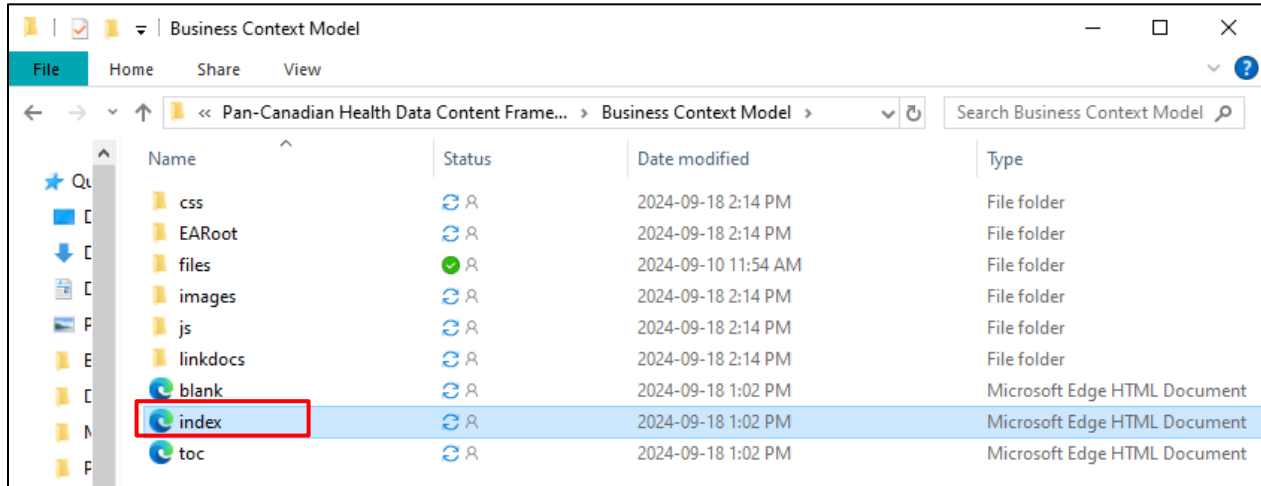

5. Open the unzipped folder.

6. Open the folder titled **Business Context Model**.

- Click the **index** link, which will take you to the Pan-Canadian Health Data Content Framework landing page.

- Your screen will now look like the image below. Click the links in the side navigation menu to view the artifacts.
