Agenda

Co-Chair

App Catalog context – how we got here

App Catalog deep dive – In Simplifier

Q&A / Collaboration

Where we reached consensus

Data Elements

Read-only Access

Areas we agreed we needed broader consultation

Data Format for exchange

The HALO working group has evaluated various options for standardizing the data model for the app catalog. After a comprehensive analysis, the decision is to proceed with **Custom JSON**.

Rationale:

- Flexibility
- Ease of Implementation
- Industry Alignment

Considerations:

- Standardization
- Terminology Integration.

Next Steps:

- Share with working group and investigate if a different format should be used

Auto App Registration

Next Steps

- What we covered before
 - ✓ High level business context, use cases, HALO standard flows
- What we covered today
 - ✓ Context behind the App Catalog: Started the App Catalog with simple structure and data format exchange
 - ✓ App Catalog deep dive
- Next Meeting
 - App Launch Deep Dive
- Future Topics
 - Pub/Sub

Next Meeting:
