

**BALLOT INSTRUCTIONS FOR THE
WITHDRAWAL OF HL7 VERSION 3
DOMAIN ANALYSIS MODEL:
TUBERCULOSIS SURVEILLANCE,
DIAGNOSIS, TREATMENT AND
RESEARCH, RELEASE 1
FOR THE MAY 2022 BALLOT CYCLE**

April 1, 2022

Dear Voter,

Health Level Seven (HL7) invites you to take part in a Comment-only level ballot to withdraw the following HL7 Standard:

**Withdrawal of HL7 Version 3 Domain Analysis Model: Tuberculosis Surveillance, Diagnosis, Treatment and Research, Release 1
(WITHDRAW_V3_DAM_TB_R1_O1_2022MAY)**

Per ANSI rules, any ANS subject to periodic maintenance shall be revised, reaffirmed or withdrawn five years (5) after its designation as an ANS. HL7 is conducting this ballot in accordance with the HL7 Essential Requirements (HL7 ER) section 03.04.01 (Reaffirmation of an HL7 American National Standard), to allow those parties with an interest in the ANS to record their position on the decision to reaffirm, revise or withdraw this ANS.

For the purposes of this ballot the question being asked is as follows:

Should the standard be withdrawn as an American National Standard, reaffirmed as an ANS, or subject to revision and brought to ballot as a new version?

Accordingly, voters should lodge their votes as follows:

- **Affirmative** – Indicates support of withdrawal of the specification
- **Negative** – Indicates support of either reaffirming or revising the specification. If you support either of these actions, indicate your reasons in the comments accompanying your negative vote.

For details on obtaining a copy of the ANS under review, please refer to the Balloting Procedures section further down in this announcement.

Review Group Ballot Open/Close Dates

The ballot pool in this document will open and close for voting on the following dates:

Review Group Ballot Open Date: Friday, April 1, 2021

Review Group Ballot Close Date: Monday, May 2, 2022

Pool sign up is closed.

Ballot Document

Clinical Interoperability Council Work Group announces the ballot opening for the following item:

Withdrawal of HL7 Version 3 Domain Analysis Model: Tuberculosis Surveillance, Diagnosis, Treatment and Research, Release 1

The HL7 Version 3 Tuberculosis Domain Analysis Model (DAM) represents the clinical processes associated with managing pulmonary tuberculosis (TB) from the point at which patients present themselves at treatment sites, through diagnosis and treatment. The process model has been split into two submodels: one for diagnosing TB, and the other for treatment

Unique Ballot ID: WITHDRAW_V3_DAM_TB_R1_O1_2022MAY

General Guidelines

The standard under consideration is available to HL7 members and non-members as a free download from the HL7 web site linked to

http://www.hl7.org/implement/standards/product_brief.cfm?product_id=24.

From this page select the download link under "Related Documents".

HL7 will conduct these ballots according to its procedure for electronic balloting.

Unique Ballot IDs: Each ballot document has a unique Ballot ID that can be found following its descriptive text. In addition, updated ballot comment spreadsheets will be available on the balloting website at the time the ballots open.

For more information on Balloting Procedures and Guidelines, see <https://confluence.hl7.org/x/-wohAg>.

For Other Balloting Help, see <https://confluence.hl7.org/x/XQghAg>

OTHER ISSUES - Should you have any other issues logging in to the Ballot Desktop, signing up for ballot pools or voting, please contact Lynn Laakso (lynn@HL7.org), Technical Publications Manager, or Webmaster@HL7.org.
